OUR $11.28 ACME PEERLESS COOK STOVE, WITHOUT RESERVOIR. FOR COAL OR WOOD.

THE ACME PEERLESS, without reservoir is offered at $11.28 to $14.00, according to size, in competition with stoves that retail at nearly double the money. This new 1902 pattern is a very large, heavy cook stove, well made and very artistically ornamented. It is especially recommended to those who wish to burn coal only, or coal and wood at different times during the year. Simply changing the grates and taking out the end linings converts it from a coal to a wood burning stove, and we furnish with every stove an extra grate for this purpose.

THE ACME PEERLESS is made from very heavy castings, and we believe is one of the most durable stoves on the market, regardless of price. Has very large flues, cut top with heavy cut centers, supported by posts, heavy covers, heavy linings, with very heavy sectional fire back. Large bailed ash pan, slide hearth plate, outside oven shelf, oven door kicker, ornamented base, nickeled name plate on front door, nickel plated panels on oven door, nickel plated door knobs, tin lined oven door, swing feed. The opening for removing ashes from under the oven is in the hearth, consequently no ashes are spilled on the floor when cleaning stove.

THE DIMENSIONS that we give are our own, and are different from many manufacturers, who include the flange of oven doors, etc., which often adds from two to four inches to dimensions. We give you net dimensions of the stove, and all space gained by swell in doors, etc., is free. **If you do not use coal at all, order the Acme Harvest from Catalogue Nos. 22TX254 to 22TX257.**

See page 801 for our liberal $1.00 to $5.00 C.O.D. subject to examination offer.

We furnish the Acme Peerless, without reservoir, at $11.28 to $14.00, delivered on the cars at our Central Ohio foundry. Prices do not include pipe or cooking utensils. See pages 778 to 790.

If you live south or east of Chicago, the freight will be less than from Chicago. If you live west or north of Chicago the freight will be about 30 cents per hundred more than from Chicago. The reason we can make the price so low: We leave out the freight to Chicago and leave out the cost of hauling and handling into and out of our store, making our price direct from factory to consumer, barely covering the cost of material and labor with but our one small percentage of profit added. A price only made possible by eliminating all the handling expenses and shipping direct from the foundry.

OUR NEW ACME BRILLIANT BASE BURNER

$21.23 TO $28.75

HARD COAL HEATER FOR 1902.

THE FINEST THE WORLD PRODUCES. A DREAM OF AN ARTIST IS DESIGN, TRIMMING, FINISHING, IN ITS CONSTRUCTION THROUGHOUT, THE HIGHEST OF HIGH GRADE BASE BURNERS, THE EQUAL OF ANY BASE BURNER HARD COAL HEATER MADE BY ANY MAKER, REGARDLESS OF PRICE.

THE ACME BRILLIANT BASE BURNER is built on new lines for 1902, newly perfected model, and it embodies all the very latest, handsomest and best features of every other high grade base burning hard coal heater made, with the defects of none. **The Acme Brilliant Base Burner excels all others in appearance, in amount of nickel work, in the economic consumption of fuel and the volume and distribution of heat.**

NICKEL FINISH. **We believe we put more nickel on the Acme Brilliant Base Burner** than is used on any base burning heater made. The nickel finish includes a large, handsomely ornamented spun brass nickel urn—we believe the handsomest nickel plated urn that is used on any base burner made; heavy, nickel plated swing top of the very latest design, full nickel dome head of a new design, heavily nickeled corner wings, heavily nickeled hearth plate, heavily nickeled ash door panel, heavily nickeled foot rails, heavily nickeled name plate and the stove stands on a full heavy nickel plated frame with nickel plated legs. The nickel plating is done by the very best process (the XXX triple plate brand), highly polished, giving the stove an appearance that must be seen to be appreciated.

IT IS MADE WITH A DOUBLE HEATING FLUE,

to which a pipe can be attached for heating an upper room or increasing the heat in the lower room; **it is made with the very latest Johnson self feeding magazine;** handsomely finished swing mica doors on three sides; heavy, large, non-destructible fire pot; latest Akron Duplex grate, with shaking ring; **large ash pan; Osgood's patent full base heating flues, tea kettle attachment and cast elbow at back.**

HOW WE MAKE THE PRICE $21.23 **Our special inside, heretofore unheard of prices of $21.23, $25.13 and $28.75, according to size, is made possible by reason of our having contracted with the manufacturer for his entire output of Acme Brilliant Base Burners,** for shipment direct from our foundry in Pennsylvania, where the anthracite coal fields are located, and where the most perfect operating hard coal base burners are produced. The contract price is based on the actual cost of material and labor, with pig iron bought at the lowest market quotations, and to the actual cost of material and labor is added **our one small percentage of profit, making a price from 15 to 25 per cent lower than inferior base burners of the same size are sold to dealers in carload lots at wholesale.**

SEE PAGE 801 FOR OUR LIBERAL $1.00 TO $5.00 C. O. D., SUBJECT TO EXAMINATION OFFER.

OUR BINDING GUARANTEE.

Every Acme Brilliant Base Burner is covered by a binding guarantee, as to quality of material, workmanship, finish and burning qualities of the stove, and if it fails to perform its duty, or if it gives out by reason of defect in material or workmanship, we will replace or repair it FREE OF CHARGE.

$10.34 FOR OUR NEW 1903 MODEL ACME CARBON DOUBLE HEATER

FOR HARD AND SOFT COAL

AT $10.34 TO $13.48 according to size, we offer our Acme Carbon Heater in a new model for 1903, a much handsomer design than the old style, the handsomest double heater on the market regardless of price.

$10.34 TO $13.48 are prices based on the actual cost of material and labor, with but our one small percentage of profit added. It is one of the biggest price making steps ever taken, the first time a handsome, nickel finished double heater was ever furnished on a PRICE PER POUND basis at within 50 per cent of the price we name. SEE PAGE 801 FOR OUR LIBERAL $1.00 TO $5.00 C. O. D. SUBJECT TO EXAMINATION OFFER.

HOW WE SUCCEEDED IN MAKING THE PRICES SO LOW, NAMELY: $10.34, $11.10 AND $13.48.

FORMERLY WE DID NOT MAKE THIS STOVE in our own foundry in Ohio, but we canvassed the stove making centers of the country to get the lowest price we could for a stove of this kind, an air tight double heater, and the lowest price we could get anywhere for a good stove was from a large leading Eastern maker; but we were compelled to pay this stove maker more money for a much inferior stove than we are now asking you for the new improved 1903 model, a very superior stove.

AFTER CLOSING OUR CONTRACT with the Pennsylvania maker for last season we continued our investigations in the endeavor to find someone who would build these stoves for less money, as our foundry was already overtaxed without adding any new styles; but being unable to get a lower price from any maker, we enlarged our own Ohio foundry so as to take in this stove and a few other new designs. We engaged some of the best pattern makers that could be found with instructions to get up the handsomest set of patterns for an air tight double heater, it was possible to get up, and this has resulted in our presenting to you our new Acme Carbon Double Heater as illustrated hereon, in the new 1903 rococo pattern, with richly nickel plated decorations as shown.

WITH OUR OWN FOUNDRY enlarged and the patterns in our possession, the question of cost became simply a question of the cost of raw material (pig iron), the melting, molding, mounting, nickeling and finishing, to which cost we have added our one small percentage of profit, and are able to name you the heretofore unheard of price of $10.34, $11.10 and $13.48 according to size.

AT THESE SPECIAL PRICES we furnish the stoves delivered on board the cars at our foundry in Central Ohio, from which point you must pay the freight; but you will find the freight will amount to next to nothing as compared with what you will save in price.

NOTE THE GREAT IMPROVEMENT in the style of the stove over last year, the handsome shape of the new model, the heavy nickel plated base, top and urn, the extra size, the improvement throughout. Also note the big reduction in price. Last year's price for the 12-inch stove was $12.30; this year's price, $10.34. Last year's price for the 14-inch stove was $15.15; this year's price, $11.10. Last year's price for the 16-inch stove was $17.80; this year's price, $13.48.

FOR COAL ONLY. SOFT COAL OR HARD COAL.

FOR A COAL HEATER, a heater to burn either soft or hard coal, a stove in which the fire can be held under complete control at all times, which will keep a fire all night, and heat the largest amount of room with the least amount of coal, we especially recommend this Carbon Double Heater. There is no stove that is more economical in the consumption of coal, no stove made that is more easily controlled, no stove made that will heat more rooms or more cubic feet for the same size of stove with the same amount of coal.

AS A GUARANTEE that this is without exception the best double heater on the market, it will heat more room with less fuel than any other like stove made, and compared side by side with any other coal burning double heater made, it is handsomer, better and about one-third lower in price, and all we ask is that you send us your order, enclose our price, let us send the stove to you by freight, and if the stove is not all we claim for it, perfectly satisfactory to you, one of the handsomest double heaters you have ever seen, you can return the stove to us at our expense of freight charges both ways, and we will immediately return your money.

WE GUARANTEE THE STOVE in every way. We guarantee it to reach you in the same perfect condition it leaves our factory. If any piece or part is broken we will replace it free of charge. We do not allow our customers to take any risk whatever.

OUR 16-INCH DOUBLE HEATER at $13.48 is large enough to heat any medium sized house. It will heat comfortably two or three down stairs rooms, and keep comfortably warm one or more upstairs sleeping rooms.

SEE PAGE 801 FOR OUR LIBERAL $1.00 TO $5.00 C. O. D. SUBJECT TO EXAMINATION OFFER.

DETAILED DESCRIPTION.

THE ACME CARBON DOUBLE HEATER has hot air opening, as shown in illustration, to which a pipe can be attached to heat an upper room, or is covered with an open cap to let the heat out into the lower room as desired. The draft supply is regulated by the screw draft supply in ash door, enabling the user to give it any amount of draft or cut it off air tight as desired.

THE OUTER CASTING is artistically carved, open fret work. It is made with beautifully nickel plated urn, nickeled swing top, large handsomely shaped nickeled main top, handsome nickeled front panel, nickeled door knobs, nickeled screw draft supply, large handsome nickeled base of the new rococo design, nickeled legs to base.

We will always carry a full supply of castings on hand so that in years to come you can always be supplied with any parts for repairs, and always at factory cost.

NOTE THE ILLUSTRATIONS. From the illustrations, engraved by our artist direct from a photograph, we have endeavored to give you some idea of the appearance of these large coal double heaters. The one illustration shows an open or inside view of the stove, the other a full view of the stove. By light and dark shades we have endeavored to show what is nickel and what is not nickel, but you must see the stove to really appreciate what a handsome double heater we have turned out in this our new 1903 model.

ACME VENTIDUCT DOUBLE HEATER AND HOT AIR CIRCULATOR.

$10.95 TO $15.55 FOR COAL AND WOOD.

AT $10.95 TO $15.55 Delivered on the cars at our foundry in Central Ohio.

TO MEET THE DEMAND for a double heating, ventilating and hot air circulating stove of the oak pattern, we had our artists, draftsmen and skilled mechanics devote their best efforts to producing a stove of this class, taking advantage of all the good points of all those produced by other makers and avoiding all the faults of construction found in those sold by other manufacturers. Examine the open view of this stove as shown below and observe the double steel casing with the air entering under the middle ring, passing up between the inner and outer steel body, circulating around under the mail top, and passing out of the hot air collar into the room or into a pipe to an upstairs room as desired. Both inner and outer steel bodies are of 18-gauge full cold rolled steel, and the hot air space between them extends all the way around excepting where the door is located. See page 801 for our liberal $1.00 to $5.00 C. O. D. subject to examination offer.

WE CAN ALWAYS FURNISH REPAIRS WHEN NEEDED IN FUTURE YEARS.

ECONOMY IN CONSUMPTION OF FUEL.

THIS OUR NEW 1903 MODEL double heating, ventilating and hot air circulating stove, of the oak pattern, is far more economical in the consumption of fuel than any direct draft stove made, and while the first cost of the stove is a few dollars more than a direct draft stove, the difference will be made up several times over, not only in the cost of fuel consumed the first season, but in the comfort you will get from the wide heat distribution that can be had only from a double heating, ventilating, hot air construction.

THE DIFFERENCE IN THE PRICE we ask for the stove as against our direct draft stove only represents the exact difference in cost to us, and while we make the best direct draft heater on the market, we especially recommend in the interest of economy of fuel, and of comfort that in selecting an oak stove, a stove for coal or wood, you take this our new 1903 model double heater.

OUR SPECIAL PRICES OF $10.95 TO $15.55 according to the size and grates wanted, barely cover the actual cost to manufacture, the cost of material and labor, with but our one small percentage of profit added.

WE GUARANTEE the price lower than the same style of stoves can be bought from any other maker, even in carload lots. As a guarantee that you will find this stove even more than we claim for it, and for economy in consumption of fuel, and for comfort, worth a dozen direct draft stoves, we will accept your order and your money with the understanding that, after the stove is received, if it is not found perfectly satisfactory in every way, the best heater you ever used in your home, you can return it to us at our expense of freight charges both ways and we will immediately return your money.

THE PRICES QUOTED for these stoves are for delivery on board the cars at our foundry in Ohio. The stoves weigh 212 to 283 pounds, according to the size. They are taken by the railroad companies at third class freight rate, and you will find the freight will amount to next to nothing as compared to what you will save in price.

We take great pains in packing and shipping these stoves, and we guarantee the stove to reach you in the same perfect condition it leaves us.

ABOUT REPAIRS FOR THE FUTURE. We will always carry a complete stock of castings and parts to these stoves, and in the years to come can furnish you any parts to replace broken parts, and always at factory cost.

ACCORDING TO SIZE AND SPECIFICATIONS. WE OFFER THIS, OUR

ACME OAK

Delivered on the cars at our Foundry in Northern Ohio, as our greatest leader for 1902--a wonder of value, the greatest achievement in stove making of the season.

THE PRICE WONDER OF THE STOVE INDUSTRY.

There is not a manufacturer of heating stoves in America that will not see our catalogue and be attracted by this most extraordinary offer, and the most astonishing thing will be how it is possible for anyone to make the stove for the money.

Retail dealers everywhere are buying these stoves in quantities from us at our special $4.84 price. Anything extraordinary that we secure, our customers get the benefit, at the same price we charge the dealers. We make no distinction, your money is as good as anybody's. All dollars look alike to us.

HOW WE CAN MAKE THE PRICE.

The new patterns for this stove were gotten out by one of the largest stove manufacturers in the country. The patterns were submitted to us with all their improvements, as the finest thing of the kind on the market, and we were asked to figure on the entire product of the factory—the entire capacity of their heating stove department—and by buying all material at that time when raw material was low, and working during spring and summer season when labor was cheap, running factory to full capacity, we learned that it would be possible to reduce the actual cost of producing this stove to what to us and other stove makers was a heretofore unheard of price; and believing our million customers everywhere would appreciate this bargain, and would take the entire lot of stoves off our hands during 1902, we closed this contract. It was the largest contract ever placed in this country for one kind of a heating stove, and hence the lowest selling price ever known in this country for high grade heating stoves.

SEE PAGE 801 FOR OUR LIBERAL $1.00 TO $5.00 C. O. D. SUBJECT TO EXAMINATION OFFER.

OUR PRICE IS YOUR PRICE.

The $4.84 to $10.89 price we quote you is the actual cost to us on our season's contract basis, with but one small percentage of profit added. Such value as was never known and never before offered by us or any other house.

Our $4.84 Acme Oak Heating Stove is the latest, handsomest Oak pattern. It is mounted with 18-gauge smooth steel, heavy ribbed single cast iron fire pot, has shaking and draw center grate for coal, has double circular wood grate which is so constructed that the fire can be kept under complete control. Large ash pan, large feed doors. Has highly polished, heavily nickel plated foot rails, large nickel plated name plate, nickel plated top ring, handsome nickel plated fancy urn, nickel plated hinge pins and knobs, large swing top, cooking lid under swing top. Check drafts at collar and in feed door. The Acme Oak is one of the handsomest heating stoves on the market. It is nice enough for any home, and would ornament any parlor.

. . BURNS ANYTHING . .

The Acme Oak is suitable for wood, hard coal, soft coal, coke or anything that can be burned in a stove.

We recommend cash in full with your order, saving the express company's charges for collection and return of money on C. O. D. shipments, and if you do not find you have got one of the handsomest heating stoves you ever saw, such a bargain as you never saw or heard of, such a stove as was never seen in your section at anything like the price, you are at liberty to return it to us and we will cheerfully refund your money.

Height of stoves as given is from floor to base of urn.

We can furnish the three large sizes with self feeding magazines for anthracite coal,

at 75 cents for No. 214, $1.00 for No. 216, and $1.25 for No. 218, EXTRA.

If you desire a Double Heater and Hot Air Circulator, see the Acme Ventiduct on the preceding page.

OUR ACME AIRTIGHT SHEET STEEL HEATERS.

FOR BURNING HARD OR SOFT COAL

DURING THIS SEASON we will sell these air tight coal burning heaters at $5.94 to $12.00, delivered on the cars at our factory in Northern Illinois, which will mean a saving to you of $8.00 to $10.00, as against the price at which these same stoves have been sold by dealers everywhere. Following we show a skeleton illustration, showing the inner construction of this airtight coal heater, with a full description of the workings of the same.

OUR SPECIAL $5.94 PRICE is made possible by reason of our producing these at our own factory; our quantity is so great we have been able to reduce the cost of material, the cost of labor; and the price we quote you is based on the actual cost of material and the labor, with but our one small percentage of profit added, and, as a result, you can own the highest grade airtight coal burning heater for less money than anybody can buy in carloads. These heaters are covered by a binding guarantee. They are made from the very best of sheet steel in our Northern Illinois factory, the best equipped steel stove factory in America, whose reputation alone is a guarantee of quality. See page 801 for our Liberal $1.00 to $5.00 C. O. D. Subject to Examination Offer.

Skeleton illustration showing inner construction of Acme Hotspur.

From this illustration you can form an idea of the appearance of this handsome new model airtight hot blast heater, the interior construction of which is shown in the preceding illustration. **It is handsomely ornamented** with nickel plated foot rails, nickel plated hot blast dampers, screw adjustment, highly ornamented with nickel plated ornaments, patent double cover on top. Manufacturers claim that 1¾ tons ordinary grade soft coal will last as long and give as much heat as one ton of the very best hard coal, and that it will hold fire of soft coal over night. From this it will be seen that it is one of the most **economical coal burners you can buy. Our special price of $5.94 and $6.77,** according to size, as listed below, is so very much lower in price than these goods have ever been sold, that we believe our customers will appreciate the values we are giving. THE NEW ERA RADIATOR.

It stops the heat on its way to the chimney and makes it do double duty. You can place a **New Era Radiator** on the stove pipe in the same room with the stove. It will actually save from one-quarter to one-half the fuel. There is no guesswork in this statement. Actual tests have proved it time and time again. One ton of coal or one cord of wood will produce nearly as much heat with the **New Era Radiator** as two tons of coal or two cords of wood without it. You can place it in an upstairs room on a pipe running through from below, and it will heat that room without the expenditure of a single extra cent for fuel. It simply uses the heat that is escaping. It is a stove that throws off heat without requiring any fuel or attention at all. No dust in the room and no ashes to carry out. No gas escapes from them and they cause no obstruction at all to the draft. They can be as easily cleaned and repaired as a stovepipe. **The New Era Radiator really costs nothing.** It pays for itself in saved fuel in a very short time.

ACME GLENWOOD

Our $6.22 and $7.43 Acme Glenwood Airtight Hot Air Circulator.

Delivered on the cars at our foundry in Central Ohio.

THE ILLUSTRATION on the left shows our Acme Glenwood with hot blast draft and hot air circulating system. This stove burns everything (excepting coal) that is used for fuel. The feed opening is 10¾ inches in diameter. The ash opening is 7 inches in diameter. Damper has screw adjustment. Ash opening is a cast drop door with a set screw fastening to make it airtight, and a screw draft opening in center to make a straight draft when desired. Takes a 6-inch stove pipe. Has nickeled foot rails and nickeled band around the top.

THE HOT AIR CIRCULATING SYSTEM takes the cold air from the floor, passes it up between the main outer jacket and out at the top, hot. By this system it will warm the furthest corner of the room as well as the space near the stove.

THE ILLUSTRATION below on the right shows the interior construction of our Acme Glenwood, with hot blast draft and hot air circulating system. For burning any kind of fuel except coal. Cold air enters the flues near the floor, is heated and rises, passing out at the top, thus creating a constant circulation of hot air.

THIS STOVE HAS ORNAMENTED CAST IRON TOP and corrugated cast iron bottom, polished steel body and heavy sheet steel inner walls made of 20-gauge steel. Height of stove, 45 inches. Height of body, 26 inches.

SIZE OF PIPE TO FIT COLLAR IS 6-INCH ON BOTH SIZES.

SHEET STEEL AIRTIGHT HEATING STOVES, 98 CENTS AND UPWARDS.

DELIVERED ON THE CARS AT OUR FOUNDRY IN NORTHERN ILLINOIS.

OUR LINE OF SHEET STEEL AIRTIGHT HEATERS includes the very best selections from the best makers in the country, and does not include any of the inferior makes on the market. We sold over ten thousand airtight sheet steel heaters last season, and all the time we were far behind on our orders, and, as the indications point to a much larger trade this season, we have made very extensive preparations to not only be able to fill our orders promptly, but with such a line of airtight heaters as will not be offered by any other house, and at prices so low that our customers can order from us, pay the freight, which will add next to nothing to the cost, and own the best airtight heater that can be made, at about half the price charged by retail dealers.

OUR DOT AIRTIGHT HEATER.

FOR WOOD.

It is the cheapest steel airtight handled by us or any other house. While it is small, it is good and suitable for small rooms. It is a direct draft stove, taking in the draft at the ash opening. Has oval sheet body 18, 20 and 24 inches long, and is not lined on the inside like our better airtights shown below. The small size does not require or have but three legs, equal distances apart, to support it. The two other sizes have four legs or feet, as shown in the illustration. These Dot Airtight sheet steel heaters are offered in competition with the cheap airtights quoted by other houses, and are better than any of them offered at anywhere near the price, but we always recommend our Hot Blast Airtight double lined heaters shown below as Catalogue No. 22T578, at $1.85, to Catalogue No. 22T589 at $3.85.

HOT BLAST SHEET STEEL AIRTIGHTS

AT $1.85 TO $3.30.

SEE PAGE 801 FOR OUR LIBERAL $1.00 C. O. D. Subject to Examination OFFER.

These illustrations show our better grade, with hot blast down draft. A better stove than those quoted above, for the following reasons: **The hot blast draft heats the air before it reaches the fuel, thus producing perfect combustion.** The double lining extends up 12 inches from the bottom. The cover to ash opening is locked securely, to prevent blowing off. It is honestly constructed of good material, with heavy lining, and **cannot fail to give satisfaction.** The body is made of 26-gauge smooth steel, the lining is 20-gauge. Has fine nickel urn. The screw draft can be closed airtight. **It will burn chunks, knots, chips, straw, cobs, hay, or trash,** or anything used for fuel, except coal. The pipe should be provided with a damper. THE WORLD'S BEST ACME GAS RANGES AT $7.33 TO $12.20

Furnished for either Artificial or Natural Gas and for any Pressure desired.

DELIVERED ON THE CARS AT OUR FACTORY IN SOUTHERN OHIO.

THE ACME OF PERFECTION IN GAS SAVING GAS RANGES.

Only the best materials are used; the highest grade of sheet steel, the highest finish of smooth, strong stove plate castings, made in a factory noted for the quality of material used. Every range is guaranteed to be perfect in operation and workmanship. The illustrations do not do justice to these elegant goods; they must be seen to be appreciated. We court inspection and comparison with any gas ranges in the market. These ranges are built for economy in fuel. They can be set near an open window or door without being affected by the draft, as the sides are closed all around. Quality in construction is first with us, and the large quantities we produce enables us to sell them at these unheard of prices, $7.33 to $12.20, for the various sizes and styles described; it is the actual cost to us in large quantities with but our one small percentage of profit added. A price made possible by eliminating all handling expenses into and out of our store in Chicago and shipping them direct from the factory to the user.

YOUR GAS COMPANY WILL CONNECT IT FOR YOU

at the same small charge they always make when bought from them. Gas companies are always glad to connect our ranges, as they are desirous of selling their product of gas and not anxious to be dealers in gas stoves. They had to go into the gas stove business because the high prices asked by the stove and hardware dealers included so much profit the people did not buy them, thus restricting the consumption of gas, but our prices are so low and we sell so many ranges the gas companies are our friends, encouraging us to sell more and more gas ranges, connecting them for our customers for the same small fee they charge when they sell a gas range, and recommending our ranges everywhere as the most economical, durable and efficient ranges to be found.

The more ranges we sell the more gas they sell, and the consumer is the better pleased on account of the beautiful range at such a low price as $7.33 to $12.20, as described below.

ACME JUNIOR SINGLE OVEN SWING DOOR GAS RANGE.

AT $7.33 AND $7.60 we offer this our World's Wonder gas range at prices lower than the lowest, lower than any dealer can offer them, lower than any gas company cares to sell them, so low that gas companies are buying them from us and are proud to connect them for you at a small fee, and so low that it relieves them of the expense and trouble of trying to sell gas ranges, for we are selling them so fast they are kept busy increasing their facilities and capacity for supplying gas.

They are recommending our gas ranges for economy, good service and low prices. This is the exact same range as the one quoted below, Catalogue Nos. 22T626 and 22T627, excepting it has only two or three burners on top, smaller oven, and we have reduced the cost by using cast stove plate doors, and they are swinging instead of drop doors. The Acme Junior is excellence itself, and as handsome as it is good. The sizes of the ovens are 14x14x10 inches; the burners are the same, except it does not have the little simmering burner, such as described on the larger stoves. The illustration shows it ready for manufactured gas. When ordered for natural gas, we furnish it with three closed lids or griddle covers.

Do not fail to state the gas pressure of your gas company and whether you use manufactured gas or natural gas.

These Standard Star Drilled Burners cannot be surpassed for durability and intense heat for cooking purposes. Our patent oven borner equally distributes the heat, being the only "Bake Even" Gas Range in use.

THIS RANGE is constructed of the best grade of smooth steel, japanned with the best locomotive black. The sheet steel is lined with asbestos. The main top, main front and frame of oven door are of the finest cast stove plate, made from the highest grades of pure pig iron, and must not be confused with the cheap mixtures of scrap iron used in so many other makes of gas ranges. The front supply pipe and cocks are nickeled.

THE "BAKE EVEN" OVENS are 16 x 16 x 10¼ inches high in the first size and 18x18x11 inches high in the large size. The oven sides and bottom are flush with the oven door opening; the oven door is spring balanced and drops on a level with the oven bottom. It is smooth and free from anything to catch the pans when drawn from the oven. The top oven plate is double, forming a circulating flue for the heat, and is the best oven construction in use. The seavenger pan under the top burners catches all the grease and dirt; it is made of galvanized iron and easily removed. When ordered for natural gas, we furnish the range with closed lids or griddle covers. Gas cocks are nickeled on brass.

GASOLINE STOVES.

The Acme Gasoline Stoves are the highest grade stoves on the market. If you purchase from us or from anyone else a Sears, Roebuck & Co.'s Acme Stove you will have a stove that will give you satisfaction in every way. They are safe, durable, simple and efficient. Remember our guarantee, if not found exactly as represented, if they will not do everything we claim for them, return them to us and money paid will be refunded. To sell stoves under this guarantee we must furnish the very best stove we can procure. THERE IS POSITIVELY NO DANGER IN USING THE ACME GASOLINE STOVE. IT CANNOT EXPLODE. Don't purchase a cheap, poorly made gasoline stove unless you have your property well insured and care little for the safety of your family. The attempt to save a dollar or two on the first cost of a stove has caused many a fire and cost many lives.

If everybody used the Sears, Roebuck & Co.'s Acme Gasoline Stoves or if all other stoves were as honestly made there would be no such thing as a gasoline stove explosion. Don't use cheap gasoline. Cheap gasoline clogs the burners and is more dangerous than gunpowder or dynamite. Our stove uses less gasoline than any other and it costs less to run it with 74 degrees deodorized gasoline than others with the cheap, dangerous, unsatisfactory low degree gasoline.

We can furnish repairs for the Acme Gasoline Stoves, but never have any calls for repairs. This indicates that the stoves are durable.

Acme Process Gasoline Stoves.

Full directions how to operate accompanies each stove.

Lights immediately without the use of a lighting cup. The most popular up to date vapor stove made. All stoves are strongly and substantially built, beautifully finished and elegantly designed.

Hot air and vaporizing tubes are connected with removable cast iron elbows, easily taken apart, so that the vaporizers can be taken out and cleaned. Vaporizers are made of perforated brass and of the latest scientific construction. Burner Drums are of the best sheet brass, and have cast iron tops and bottoms. Cone seats are made of cast iron. Cone seats have large iron flanges so as to protect the drums from heat, grease and dirt, which have always caused burner drums to either burn or rust off at the top. This improvement makes all hot air conductors indestructible. A great improvement and one worthy of your consideration. Burners are fastened together with two bolts, easily taken apart. Tanks for 1902 are simple, perfect and a proven success. Needle points on valves are made of German silver wire, they will never rust or corrode, and will always insure a steady drip. Tanks are so constructed that they cannot be removed for filling until all valves have been closed. Acme Process stoves will run perfectly in cold weather.

OUR ACME SINGLE GENERATOR GASOLINE STOVES.

Eleven Reasons Why the Acme Single Generator is the Best Single Generator.

Because: 1st—It is as simply made as an individual burner and lights by filling a lighting cup with the fluid to heat the burner to the vaporizing point.

2d—It is the most durable generator ever made.

3d—It generates for each burner through separate channels.

4th—It is the only generator on which the failure of any one burner does not interfere in the least with the perfect running of balance of stove.

5th—It is the quickest starting burner on the market, requiring about one minute in getting to the generating point.

6th—It will generate perfectly as low a grade of gasoline as any individual burner.

7th—It uses less gasoline than any other generator made, as each burner is provided with a separate generating channel, and the shutting off of any burner lessens proportionately the generating capacity of the generator and the proportionate wasting of gasoline.

8th—When generator burner is running alone, it has no more generating capacity than any individual burner, producing at all times a perfect, even blue flame, a result that cannot be attained by any other single generator.

9th—It is cast solid and then drilled, avoiding the danger of the presence of sand, which is a frequent cause of trouble in a cored generator.

10th—It is provided with a handy and simple sub-burner device.

11th—The sub-burner, at a cost of running not to exceed one cent per day, keeps the stove constantly ready for immediate use. It is not necessary to run the sub-burner when the generator burner is running.

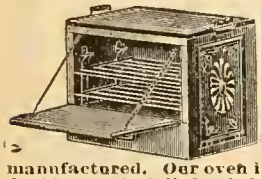
Gasoline and Oil Stove Ovens.

We have spared no trouble or expense to produce beautiful and perfect ovens. They are larger than any other ovens on the market, lots of room inside, wide space between grates. Will do the largest loaves of bread or roasts of meat without touching upper grate. They are full flued, tin lined, ventilated perfectly, air chamber in door, tastily designed—first class in every particular. Anything done in them comes out sweet, clean and wholesome. The heat is evenly distributed, baking the tops of articles as thoroughly as the bottom without change of position. All have decorated steel tops.

Our Acme Drop Door Steel Oven at $1.65.



We show in this illustration a special oven which we have made particularly for our Acme Wickless and Gasoline Stoves. No better oven is on the market; in fact, we consider it the best oven in every respect that is manufactured. Our oven is a drop door steel oven, double cased, full flued, full tin lined, exactly as shown in illustration. Outside measurements, 13¾x21 and 19¼ inches high.

$4.33 Buys Our High Grade Acme Wickless Blue Flame Kerosene Oil Stove.

Delivered on the cars at our factory in Northern Illinois.

THIS STOVE WILL BURN KEROSENE. With kerosene it has the great advantage that it is a wickless stove. No wick is required, and we believe that we stand in no fear of contradiction when we say that it is the only successful blue flame wickless stove made. It is easily and quickly lighted, has powerful burners and is durable, convenient and most economical.

DESCRIPTION OF OUR CELEBRATED ACME WICKLESS BLUE FLAME OIL STOVE.

Frame made of extra quality sheet and band steel with middle brace. The supply tank containing the oil is removable, and can be taken off the stove without removing troublesome bolts or screws for the purpose of filling the reservoir with oil. If these stoves are set anywhere near level, the lighter cannot be flooded, because the oil cannot rise any higher than the level in the lower reservoir. The flame will, therefore, always remain the same height, no matter how wide open you have the supply valve. You light the stove exactly as you would light a lamp, and when combustion is started the flame becomes a blue flame of perfect combustion. The stove is so simple that really no directions are required. We, however, attach a card of simple instructions to each stove. We make special ovens for use on these stoves, and these ovens are the most perfect made and warranted to bake satisfactorily. See Catalogue No. 22T672 for sizes and prices on ovens.

See page 801 for our liberal $1.00 to $5.00 C. O. D., subject to examination offer.

OIL HEATING STOVES.

OIL HEATING STOVES are a great convenience for heating rooms where there is no chimney. They are perfectly safe, no more danger than with an ordinary lamp. If the wick needs trimming, don't cut it, simply rub the crust off with a cloth or brush. Use only the best grade of kerosene or coal oil. Don't spill any oil on the tank when filling, it might cause an odor. Our wick raising device is so constructed that it grips the wick on both sides and raises it evenly, and it is impossible for it to bind. Anyone can put in a new wick in a minute. This is a very important feature in an oil stove. Our smokeless attachment is simple and perfect. It is set so you can not turn the wick up too high and make it smoke.

CUARANTEE. All our Oil Heaters are carefully inspected before shipment and are warranted to do all we claim.

Real Heat Makers.

The entire stove is made of sheet steel. The drum tilts back for lighting. The burner is made of brass, the tanks of double coated steel and have outside place for filling so the tank does not require removing. Our new wick raising device raises the wick evenly and does not get out of order. They are fine in appearance and as good as they look.

See page 801 for our liberal $1.00 to $5.00 C. O. D., subject to examination offer.

This illustration shows how the Universal and Ever Ready tilt back for lighting.

LIVE STOVE DEALERS BUY FROM US.

The best stove dealers in the country, merchants who appreciate value, who are influenced by price and not by prejudice, are buying their stoves from us. We are getting single, dozen and carload orders from the best buyers in every state and territory. They have learned by comparison that we sell a higher grade of stoves at a lower price than any jobber or stove maker in America, and while our prices are alike, whether we sell one stove or one hundred, they give us their orders, ask us to furnish the stoves without our name or name-plate on (which we can do in almost every case), and they are then able to undersell their competitors, furnish a better stove and double a stove business that otherwise would be impossible.

WE APPEAL TO THE SHREWD STOVE MERCHANTS

in every state and territory, to their careful consideration of the line of stoves we show, and we ask you to set aside any prejudice you may have for the competition you get from our catalogue, and on the basis of more value for your money than you can get elsewhere, send your stove orders to us.

DEPARTMENT OF MEN'S AND WOMEN'S FURNISHING GOODS.

IN ORDERING GOODS from this department we especially urge that you use the utmost care in giving us proper measurements. In shirts, underwear, hats, gloves, in fact everything which requires a size, be sure that you state the size wanted in your order; otherwise it will be necessary to hold your order until we can hear from you. This means not only an expense to us, but a loss of time and a great deal of annoyance to yourself. With proper care on your part in making out your order, all this annoyance may be obviated.

OUR FURNISHING GOODS DEPARTMENT was never more complete than it is this season; never before have we been able to offer more attractive, stylish and low priced lines of everything included in this department. In ordering from us you are assured of not only buying the goods at the lowest possible prices, but you have the advantage of a selection equal to the very largest exclusive furnishing goods stores in metropolitan cities, a much finer and more varied assortment than is carried by the average dealer, and you may feel assured that whatever you find illustrated and described on these pages is correct in style.

WE RECOMMEND that wherever possible you combine your order for shirts, hosiery, underwear and other furnishing goods with such other supplies as you may need, or club together with your neighbors so as to make up a freight order. In this case the cost of transportation by freight on a supply of furnishing goods will be little or nothing compared with what we save you.

NOTE OUR PRICES. Every item in this department is a splendid value. The saving offered over the usual store prices varies from 20 to 50 per cent. Nearly all of our 75-cent items retail at $1.00, our $1.00 articles will cost you elsewhere $1.25 to $1.50. With no expense for free catalogues, etc., pricing our goods on the basis of actual manufacturing cost with but our one small percentage of profit added, we name prices on the best grade of furnishing goods that make competition for us simply out of the question.

S., R. & Co.'s Special Warranted Boys' Stockings, 20 Cents per Pair.

No. 16T2612 We present herewith the best heavy cotton stocking, for boys (girls wear them, too), made in the United States. There are many cotton stockings that are good and many that are advertised as better than any other, but this **special stocking made for us** excels all others for wear, strength and elasticity. Instead of simply making the leg of the usual weight with double knee, the **entire leg** is made extra er what is called triple weight throughout, and the entire foot is extra heavy and closely knit, making a wear resisting stocking never before equaled. The tops are perfectly finished and will not ravel out in any way. Every pair is accurately sized. **You will be satisfied with no other stocking after buying this one.** We recommend this cotton stocking, either for boys or girls above any other made in this country for wear and intrinsic merit. It is true economy to buy such children's hose, and if not the most satisfactory stocking you have ever bought for your children we will refund the price paid. **We want your order, because you will find it better than any stocking sold at from 25 to 35 cents a pair.** Color, black only. Racine Feet.

No More Darning.

Racine feet are popular throughout the country, because they save labor and time. When stocking feet are worn out and the legs are still good, the sewing on of new feet makes practically a new stocking, which might otherwise have been thrown away. Mothers will appreciate this saving of time and money by sewing new feet on children's stockings. To attach the feet, turn leg of stocking inside out. Insert the foot inside the leg right side out, allowing the edges to meet, when they can be easily stitched on a machine or by hand, taking a seam about one-eighth of an inch wide. Children's sizes, 5, 5½, 6, 6½, 7, 7½, 8, 8½, 9, 9½ and 10; ladies' sizes, 8, 8½, 9, 9½ and 10; men's sizes, 9½, 10, 10½ and 11.

...OUR UNDERWEAR DEPARTMENT...

It is no exaggeration to say that our Underwear Department is complete in every detail, in the sense that we present to our customers only those articles in underwear which we know will give satisfaction.

Our line consists of more than 250 kinds, which cover the whole range of the different weights and qualities suitable for persons in any climate, and also those kinds frequently required or recommended by your physician for a particular purpose. Light weight for summer, medium weight for spring and fall, regular winter weight and the extra heavy kinds for those whose occupation subjects them to much exposure.

OUR PRICES. Each and every price as stated in our Underwear Department represents a special value. We do not offer one garment at cost, or less than cost, simply to attract your order and then overcharge you on other goods, but the sole aim and purpose in this department is to give the best value obtainable at the lowest price in each and every kind, and in this we believe we have excelled all our competitors. We can save you from 25 to 40 per cent on this kind of goods, as we purchase direct from the manufacturer and transfer direct to you with but the one small profit over the cost to produce.

WE WANT YOUR ORDER because we can sell you good underwear the cheapest. Our stock is selected from thousands of different kinds and qualities, by men of wide experience with this kind of merchandise, who exhaust every effort to obtain the honestly made underwear. We therefore have described each kind accurately, because we know how they are made, and what they are made of; and we warrant each to be exactly as represented, and if not will refund your money.

MEN'S UNION SUITS.

The greatly increased demand for men's union suits is due to their merit as a practical garment. Nearly every man has suffered from time to time the annoying tendency, particularly in warm weather, of his undershirt to roll up his back and the inclination of the drawers to slip to an uncomfortable position. This is all overcome by the simple, common sense garment called the union or combination suit. Those sold by us are based on scientific proportions and we guarantee a fit, except in cases of men who are of extreme proportions, far out of the ordinary.

HANDKERCHIEF DEPARTMENT.

The growth of our handkerchief department demonstrates to us that our customers are finding out that we can save money for them on small as well as large items. The reason why this department grows so rapidly is because we are offering handkerchiefs, whether cotton, linen or silk, at the lowest possible prices. In domestic cotton handkerchiefs our prices are the lowest, based on the cost to manufacture, for we buy them direct from the manufacturers. Linen, embroidered and silk goods are imported by us, without middlemen's profits.

We warrant every article to be as represented and satisfactory or we refund your money.

POSTAGE. When ordering by mail, allow postage as given with each number.

PRICES. Some numbers in handkerchiefs are sold by the dozen only. Because of the extremely low price we cannot sell them in smaller quantities.

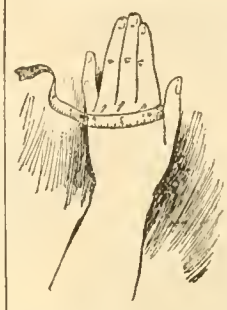
GLOVE DEPARTMENT.

OUR GLOVE DEPARTMENT IS ONE OF THE LARGEST IN THIS COUNTRY.

How to Fit a Kid Glove.

In order that satisfactory wear may be had from a kid glove, it is very necessary that it should be put on right the first time. First push the fingers in, leaving out the thumb, and work them into place by rubbing from the tips downward. **Do not press down between the fingers.** Insert the thumb and apply same method as used with fingers; then push the glove on up the hand. **Do not pull by taking hold at wrist, as this destroys the shape. Remember your gloves will give lasting service if fitted right the first time.**



How to Measure Hand for Size of Glove.

Draw a tape around the knuckles, as shown in the illustration. Ladies' kid gloves are not made in sizes larger than size 8, and in fancy colors or the finest qualities do not run larger than 7½.

Ladies' kid glove sizes are as follows:
5½, 5¾, 6, 6¼, 6½, 6¾, 7, 7¼, 7½, 7¾, 8.

Glove Talk.

Ladies' kid gloves are warranted by us only against manufacturers' imperfections. If workmanship is bad or the leather defective, we will exchange for a new pair, provided they are returned to us at once. We cannot exchange gloves that have been worn or make good any ripping or tearing due to carelessness in trying on.

Always give color and size.

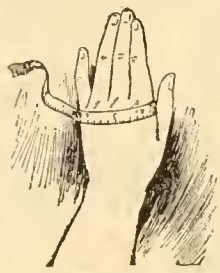
MEN'S GLOVES.

WE ASK SPECIAL ATTENTION to our very complete assortment of men's gloves for all purposes—dress, driving, working gloves, etc. Our prices, a comparison will show, are extremely low for the qualities described. Bear in mind, our descriptions are accurate and truthful. When we say a glove is made of buckskin, it is buckskin and not an imitation.

IN DRESS GLOVES we show all the leading and popular styles, and you can make no mistake in your selection.

IN DRIVING AND WORKING GLOVES we can recommend every number listed, as we do not catalogue a glove unless it has stood our test for wearing qualities.

OUR PRICES ON GLOVES are uniform with our prices on other goods, and will average 20 to 30 per cent below the prices usually asked.



How to Measure Size of Glove.

BUCKSKIN GLOVES.

SPECIAL NOTICE. We warrant every pair of Saranac, Plymouth and Indian tan buckskin gloves to be genuine deer or buckskin. All deer skins are more or less scarred. They become scratched while the animal is running wild, or by dragging over the ground after the deer has been killed. The scratch, break or crack is not usually very deep, only the outer grain is broken. The "true skin," or fibrous portion, is not injured, so the wearing quality of the leather is not materially hurt. It is, therefore, seldom that buckskin gloves do not bear scratches, either large or small.

TRUNKS AND TRAVELING BAGS.

WE SELL TRUNKS AT ALL PRICES. We can suit you in style and quality. We want your order, because we can sell you GOOD TRUNKS AND BAGS CHEAPEST. In trunks and bags, as in most other kinds of merchandise, we recommend the medium and better grades, for they are cheapest in the end. A dollar or two added to the price of a trunk may mean many years of additional usefulness. The particular reasons why we deserve careful consideration and your order, is because we protect you from high prices, from dishonest quality and workmanship. While we sell the cheaper kinds as well as the better grades, each represents the best value of that kind at lowest possible prices. We do not offer one kind of trunk or bag at cost and then ask you to pay too much for another. THERE IS INTEGRITY in trunks as in other merchandise. They should be made to stand the wear and tear which they are sure to get from time to time.

OUR TRUNKS AND BAGS are made under careful supervision; every nail, rivet, clamp, hinge and lock is attached with the exactness and skill of thorough workmen. THIS IS WHY WE WARRANT EVERY TRUNK AND BAG to be as represented and the best of its kind at the lowest possible price.

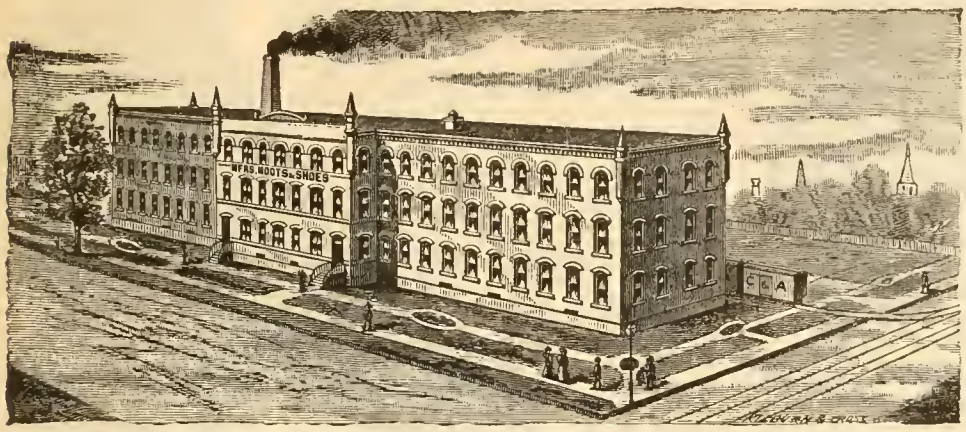
BOOT AND SHOE DEPARTMENT.



OUR NEW 20th CENTURY SHOE PLANT. Devoted exclusively to the manufacture of fine shoes.

OUR FACTORY was taxed to its fullest capacity last season, and to meet the increased demand for home made shoes we have added more new machinery, thus placing us in a position to make the very best at the lowest prices.

ONE ORDER OF 35,000 PAIRS is now being made for the United States government, thus demonstrating the high quality of the goods produced. If you appreciate value, the latest styles, foot fitting and shape retaining shoes, send us your order. Tell your friends about us.

HOW TO ORDER. Be sure to state size and width you want.

IT IS CHEAPER to send ladies' shoes, slippers, etc., by mail than by express. The postage rate is 1 cent for each ounce. When you wish goods sent by mail, always send cash in full and include enough extra to pay postage, and we will ship by mail postpaid. Be sure to enclose enough extra to pay postage. If you send too much we will promptly return what is over. Weight is given under each description that you may know the amount necessary to send. THE WIDTHS RUN: AA, extremely narrow; A, extra narrow; B, very narrow; C, narrow; D, medium; E, wide; EE, very wide.

WE RECOMMEND good shoes. Poor shoes cost less, but do not wear so well, hence the best shoes are cheapest in the end.

OUR FAMOUS ELASTIC INSTEP LACE SHOE FOR ONLY $2.00

AND A LITTLE HISTORY OF WHY WE WERE COMPELLED TO MAKE THIS STYLE SHOE IN OUR OWN FACTORY,

AND WHY WE HAVE DISCONTINUED SELLING THE JULIA MARLOWE LACE BOOT.

The widely advertised Julia Marlowe Lace Boot, with elastic instep, was fomerly quoted by us at $2.65. The regular retail price of the Julia Marlowe lace boot, is $3.00, which price represents a larger profit than we care to ask of our customers, and following our established policy of uniform small profits we refused to raise the price to $3.00.

IN ORDER TO UPHOLD THIS PRICE OF $3.00 the manufacturer of the Julia Marlowe lace boot refused to sell us unless we would charge our customers $3.00; we thereupon started to make an elastic instep lace shoe in our own shoe factory, making a shoe combining all the good features of other elastic instep lace boots with additional slight improvements of our own. The accompanying correspondence we believe will prove of considerable interest to our shoe customers, and it goes to show to what lengths we will go in protecting our customers against high prices.

Milwaukee, Wis., Oct. 25.

Mr. Frank Case, (Manager of Shoe Department, Sears, Roebuck & Co.,)
Chicago, Ill.

Dear Sir: I take the liberty of sending you herewith a letter received today. This contained the advertisement cut out from your catalogue wherein you advertised "Julia Marlowe" shoes for $2.65. You will notice that this one letter speaks of two cases and you can realize the effect that this would have upon our business were we to sanction the continuance of the same.

I trust as a matter of fairness toward us, who have always endeavored to treat your house with the utmost consideration, that you will see proper to comply with my request to resume the price of $3.00 in the place of $2.65. I believe you will sell fully as many goods at the advanced price.

Be kind enough to take the matter up as soon as possible and inform me of your conclusions.

Kindly return the enclosed letter with your answer.

Respectfully yours, A. W. RICH.

THE LETTER THAT FORCED US TO MAKE THIS SHOE IN OUR OWN FACTORY.

Milwaukee, Wis., Nov. 22.

Messrs. Sears, Roebuck & Co., Chicago, Ill.

Gentlemen: We have today forwarded four sample pairs of "Julia Marlowe" shoes and oxfords, as per enclosed invoice, which we trust may please you sufficiently to justify you to advertise them in your next catalogue, and give us your orders for the same. We feel very confident that you will find every number a good seller and one that will yield you a good profit. We have made the prices net cash, and have also **stated the prices at which these goods must be retailed,** being the same as sold for by our other customers, except one shoe which we sent you at $1.50, net, on which you can fix your own price, and we believe you will find it a very excellent shoe for the money. In this connection permit us also to say that the writer, Mr. Rich, has written to your Mr. Case on the 25th of last month with reference to upholding the price on our "Julia Marlowe" goods. **Of course, we cannot undo the injury that has been done through the cutting of prices in your last catalogue,** which we must say that while we appreciate your trade very much, and desire, as we have done, to give you every advantage that we can with our goods, **we would be compelled to forego the pleasure of doing business with you unless your advertised prices on our "Julia Marlowe" line** would be the same as they are sold at by other dealers, namely, the "Julia Marlowe Lace Boot," which you now carry, at $3.00 instead of $2.69 as you advertised it, and the "Julia Marlowe Oxford," at $2.00 instead of $1.75. Be kind enough to give us your answer upon receipt of this letter, which we trust will be favorable to our request.

Very respectfully yours, THE RICH SHOE CO.

WE MAKE OUR SPECIAL
$2.00 ELASTIC INSTEP SHOES,
FROM THE VERY FINEST SELECTION OF VICI KID STOCK.

Made over our handsome Cincinnati last with plain stitched tip toe. The style of heel foxing is the very latest, and we fit the shoe with a medium concave heel. Everything that enters into the construction of this shoe is strictly high grade, including fast color eyelets, black satin inside top band, and to produce the most comfortable shoe possible we have made it with a medium weight sole, sewn and very flexible. To those wishing a strictly high grade shoe, one combining with style a shoe with the famous elastic instep, a shoe equal to this style of a shoe widely advertised at much higher prices, we especially recommend this number. Understand there is no better shoe of its kind made. If you order this shoe, we ask you to compare it with any other elastic instep shoe, no matter at what price, and if you do not find it in every way equal, in every way satisfactory, and by far the biggest value ever shown, do not keep them, but return them to us and get your money back.

Sizes and half sizes, 2½ to 8. Widths, C, D, E and EE.

No. 15T29 Our special price per pair..... $2.00

WE WILL NOT BE DICTATED TO when it comes to asking high prices. We will not permit any manufacturer to tell us at what price we must sell his goods, if in our judgment these prices are exorbitant, and mean the taking of an unfair profit from our customers. Rather than sell the Julia Marlowe elastic instep shoe at even $2.65 when we believed a shoe of the same quality could be produced for less money, we decided to make this style in our own factory and save the manufacturer's profit, and as a result, we offer this style in the highest grade shoe made of the very best materials, guaranteed in every way, for only $2.00.

WE ARE WITH THE PEOPLE as against high prices. We are on the side of the great buying public, and we will not tolerate any attempt on the part of any manufacturer or dealer to sell his goods to our customers through us and through our catalogue at a profit that we believe is excessive.

WE MAKE A PLAIN STATEMENT OF THE FACTS. We are willing to tell our million customers very plainly WHY WE HAVE DISCONTINUED SELLING THE JULIA MARLOWE SHOE, and how it happens that we are able to offer this style shoe for only $2.00. In our earnest endeavor to protect our customers against higher prices, to stand between them and excessive profits, we were compelled to take up the manufacture of this shoe, and

Our customers get the benefit of this step.

LADIES', MISSES' AND CHILDREN'S LOW HEEL, UP TO DATE SHOE, $1.75, $1.40 AND $1.20.

We are the originators of the misses' and children's fancy foxed shoe as shown in our illustration. We are for the first time able to offer our customers a strictly high class dress boot made of fine quality dongola with the latest style of patent tip.

THIS SHOE CARRIES A MEDIUM HEAVY, SEWN SOLE, WITH A VERY LOW HEEL.

This style of heel is taking the place of the old fashioned spring heel. It is no higher than the spring heel, but it has a much better appearance on the foot, as it causes the instep to arch in a way that makes the foot appear much more shapely. We are the first to quote the misses' and children's shoe in this handsome style of foxing. For service, style, and dress wear we are unable to build a better shoe than the one we here illustrate.

WE QUOTE THIS SHOE IN LADIES' SIZES, AS HIGH AS SIZE 7.

You would be unable to secure this shoe in these sizes anywhere else, no matter what you would pay.

We guarantee this shoe to be the best in the world for the money, and assure you that if you should receive a pair from us you would be well pleased with them.

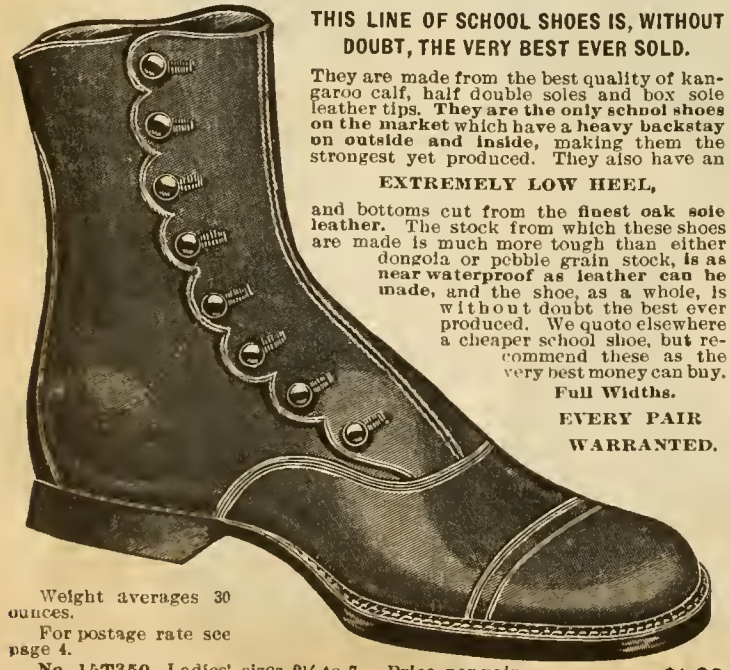
SEARS, ROEBUCK & CO.'S BEST SCHOOL SHOES.



THIS LINE OF SCHOOL SHOES IS, WITHOUT DOUBT, THE VERY BEST EVER SOLD.

They are made from the best quality of kangaroo calf, half double soles and box sole leather tips. **They are the only school shoes on the market which have a heavy backstay on outside and inside,** making them the strongest yet produced. They also have an

EXTREMELY LOW HEEL,

and bottoms cut from the **finest oak sole leather.** The stock from which these shoes are made is much more tough than either dongola or pebble grain stock, **is as near waterproof as leather can be made,** and the shoe, as a whole, is without doubt the best ever produced. We quote elsewhere a cheaper school shoe, but recommend these as the very best money can buy.

MEN'S GENUINE SHELL CORDOVAN LACE, $2.85.

It is an established fact that Cordovan leather is the most durable leather ever used in the manufacture of shoes. The fine texture of this leather renders it waterproof, is extremely firm, and the shoe made of this leather will retain its shape longer than any material that can be used. No leather takes and retains a finer polish than Cordovan. People who have worn the Cordovan shoes can seldom be induced to wear calfskin or other leather. We make this shoe with a superior quality of seal top, as found in $6.00 and $7.00 styles. The handsome perforated tip covers a medium wide coin toe. The half double sole is made of solid oak leather with modest extension soles, sewed with a single row of stitching. The eyelets are fast color. The shoe is nicely trimmed inside with a deep leather top facing. A full English hack stay.

Sizes, 5½ to 11. Widths, C, D, E and EE. Average weight 30 ounces.

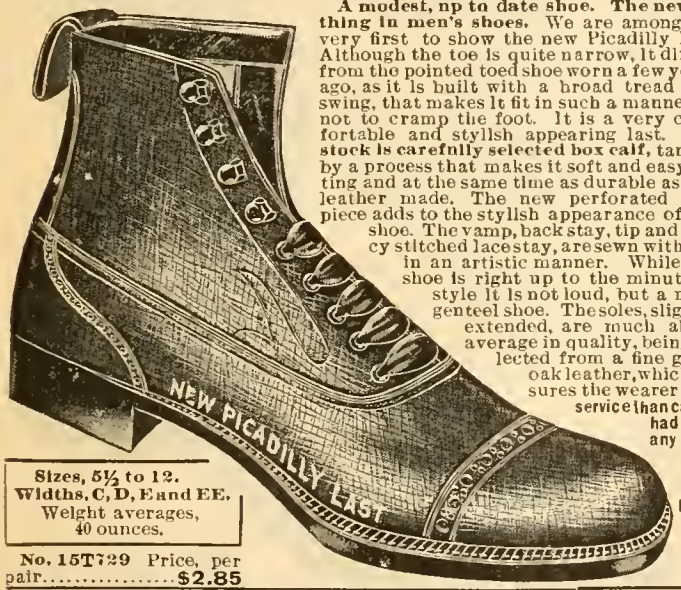
MEN'S BOX CALF GOODYEAR WELT PICADILLY LAST, $2.85.

A modest, up to date shoe. The newest thing in men's shoes. We are among the very first to show the new Picadilly last. Although the toe is quite narrow, it differs from the pointed toed shoe worn a few years ago, as it is built with a broad tread and swing, that makes it fit in such a manner as not to cramp the foot. It is a very comfortable and stylish appearing last. **The stock is carefully selected box calf,** tanned by a process that makes it soft and easy fitting and at the same time as durable as any leather made. The new perforated heel piece adds to the stylish appearance of the shoe. The vamp, back stay, tip and fancy stitched lace stay, are sewn with silk in an artistic manner. While this shoe is right up to the minute in style it is not loud, but a neat, genteel shoe. The soles, slightly extended, are much above average in quality, being selected from a fine grain oak leather, which assures the wearer more service than can be had from any other shoe at this price.



Sizes, 5½ to 12. Widths, C, D, E and EE. Weight averages, 40 ounces.

THE STYLE OF LAST is as near the correct foot form as can be made. The new Seroco toe is a medium wide knob opera with fancy perforated and stitched tip.

THE STOCK IN THIS SHOE is of the finest quality of box calf, celebrated for its wear, comfort and durability. The vamp and lace stay are handsomely perforated in very latest manner. To make a GOOD SHOE it requires good material and expert shoemakers. We do not put on just one solid top lift and use poor material in under lifts, as found in the majority of shoes, even in the higher priced shoes, causing them, when wet, to crack open and get out of shape.

THE SOLES are of oak tan leather, sewn in the latest style rope stitch double welt process with ¼-inch extension. Two rows of stitching sewn entirely through both soles, making it an everlasting sole.

Sizes and half sizes, from 5 to 12. Widths, C, D, E and EE. Average weight, 43 ounces. For postage rate see page 4.

It is made from strictly first quality pure gum rubber over a heavy imported duck, thereby producing a boot which is as nearly puncture and snag proof as it is possible to make it. We build this boot with an extra heavy sole and tap and with rolled edge to heel, thereby protecting the uppers and making the boot much more durable. Friction lined only. Should you desire more warmth, we recommend the Arctic Sock, which will produce more warmth than the ordinary felt lined boot and can be taken out at night and dried. Sizes, 6 to 12, no half sizes. Men's Duck Boots, Rolled Soles, $2.60.

We herewith illustrate our men's short boot made over a heavy imported duck cloth and with pure gum rubber, thereby producing a boot which is thoroughly water proof, and by far the most durable that we have ever been able to offer. We make this boot with an extra heavy sole and a heavy rolled edge to the heel. In order to make the heels more solid than those usually found, we have riveted them, thereby making them much more substantial than is usually found on the rubber boot.

We quote the regular dull finish boot and at a price somewhat lower than we must charge for this one, but we want to call your attention to the fact that this boot is the best that money can make and is much cheaper in the long run than the ordinary common boot. We make it with friction lining only and would suggest that the Arctic Sock be used in case a warmer boot is required. This sock can be removed at night, thoroughly dried and will give, together with this boot, much better satisfaction than the old fashioned felt lined boot. Sizes, 6 to 13. Weight, about 90 ounces.

The Knit Boot which we put in this combination is strictly all wool, is made by the latest improved knitting machinery and then thoroughly shrunk, making a very much more shapely and durable knit boot than we have ever seen. The crack proof rolled sole Perfection overshoe being made from a heavy duck, covered with first quality pure gum rubber, it is very much superior to those usually sold. The rolled sole is a special feature and one which adds much wear to the outfit, from the fact that it protects the shoe where the upper and the sole join.

We have named an exceedingly close price for this outfit hoping to induce our patrons to buy the best, and should you favor us we guarantee to give you such an outfit as you cannot possibly secure elsewhere for a similar price. When ordering always state size of shoe worn. Sizes, 6 to 12.

=SPECIAL NOTICE=

TO

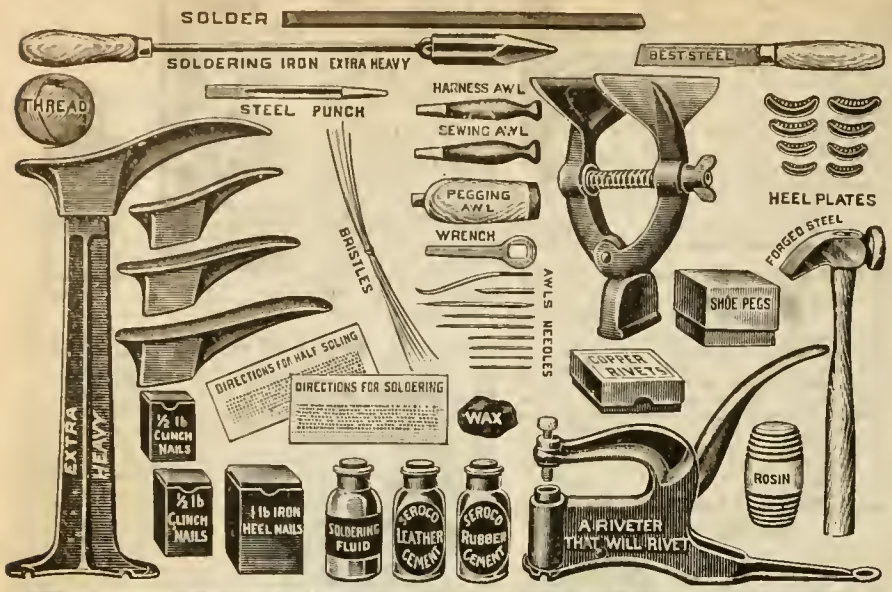
Shoe Merchants and all Dealers in Shoes.

WITH THE ESTABLISHMENT of our own shoe factory, a factory as large and complete as any shoe factory in the States, we are able to offer special inducements to dealers as well as to our regular customers. Our prices on standard lines of shoes, whether bought by single pairs or by dozen pairs, are as low, and in some cases even lower than the prices asked for the same qualities by wholesalers and jobbers, and the up to date shoe merchant, who sets aside any prejudice he may have against buying from a catalogue house, will find it greatly to his advantage to study our Shoe Department carefully, our goods and prices and favor us with a trial order.

WE KNOW that the live shoe merchant who will buy from us at prices as quoted in this department, will be able to sell these goods at a fair profit to himself and yet give the best retail shoe value in his town. With our increasing business and our constant lowering of prices, we feel able to solicit not only the patronage of the consumer or individual customer, but also the trade of the dealers who have heretofore been buying of the wholesalers and jobbers.

IF YOU ARE A DEALER we ask you to send us a trial shoe order, and if you do not consider that you are saving money by buying of us, simply return the goods and we will refund your money, including transportation charges.

$1.98 BUYS THE BEST COMBINATION SHOE, HARNESS AND TINNERS' OUTFIT EVER BUILT



A COMPLETE SET OF SHOE, HARNESS & TINNERS TOOLS

THE ONLY OUTFIT MADE CONTAINING FORGED STEEL TOOLS.

ORDER THIS OUTFIT AT $1.98 and if you do not say it is for all practical uses worth a dozen of any other outfits on the market, you can return it at our expense and we will return your $1.98. Before getting out this big high grade outfit, we purchased the best outfits advertised by other leading houses at $1.60 to $2.50, and we found the best outfit in the lot compared with our big $1.98 outfit about as follows:

OUR HAMMER is made of the best forged steel. The other outfit contained a worthless cast iron hammer, costing 48 cents a dozen.

OUR KNIFE costs as much as two of the other knives.

OUR SOLDERING IRON is extra heavy, the other light and worthless.

OUR RIVETING MACHINE is high grade and practical, the other is almost worthless. We found the same comparison on almost every item that went into the outfit. The best outfit we found put up in a cheap, common box, while ours goes into a handsome stained and varnished hinged tool chest.

OUR BIG $1.98 OUTFIT

IS THE ONLY THOROUGHLY RELIABLE AND PRACTICAL OUTFIT ON THE MARKET FOR THE REPAIRING OF BOOTS, SHOES, HARNESS AND TINWARE, ALL HIGH GRADE, STANDARD TOOLS AND FURNISHINGS . . . . . .

EVERY ARTICLE contained in this outfit is the best money can buy, suitable for the best shoemakers', tinners' and harness makers' use. We guarantee each and every tool to be of the best quality and to give the best of satisfaction. The tools are made by the best manufacturers of the highest grade of tools. The outfit is not composed of worthless cast iron hammers, worthless riveters, knives that will not keep an edge, soldering irons too light to hold the heat and do the work. It is put up on honor, containing only carefully selected tools of the highest standard offered in any combination outfit.

OUR SPECIAL PRICE OF $1.98 barely covers the cost of material and labor, with but our one small percentage of profit added.

OUR CHEAPER OUTFIT AT $1.29 is in every way equal to the best outfit advertised by other houses at $1.60 to $2.50. If any combination outfit you can get from any other house at $1.60 to $2.50 is good enough for you, you will find our $1.29 outfit in every way equal to the best; in fact, it is almost identical to several outfits we got from other houses that sell at $1.60 to $2.50. We, however, urge you to order this, the highest grade outfit made, and when you get it, if you do not say that our forged steel hammer, knife, riveter and soldering iron are worth a dozen of the same tools furnished by others, if you do not say that our outfit at $1.98 is cheaper than any outfit offered by any other house, even at half their present selling price, you can return it to us and we will immediately return your $1.98.

OUR FAMILY BOOT, SHOE, HARNESS AND TINWARE MENDER, $1.29.

ADVERTISED BY MANY CONCERNS AS FIRST QUALITY AT $1.75 AND $1.50.

WE HAVE HAD OUR ATTENTION CALLED TO OUTFITS which, illustrated, look about as our $1.98 article, and at a price which to our customers seemed very low. The usual price of this outfit is anywhere from $1.50 to $1.75. For the benefit of those of our patrons who have seen this outfit advertised at the above mentioned price, we have decided to put in the same outfit, and you will, no doubt, recognize the illustration as the same that you have seen advertised from $1.50 to $1.75. We now offer it to you at the wonderfully low price of $1.29 each. The articles which go to make up this outfit are not to be compared as to quality with our $1.98 outfit shown above. This outfit, at the price named, would necessarily have to be of inferior quality. Please understand, however, that this outfit contains exactly the same tools as those generally sold at a higher price.

SEARS ROEBUCK & CO'S FAMILY COBBLER, TINKER AND HARNESS MENDER

A COMPLETE OUTFIT FOR GENERAL SHOE, HARNESS AND TINWARE REPAIRING.

Department ... of ... MEN'S CUSTOM TAILORING.

It will pay you to read our clothing talk in this catalogue, because you will be better posted in the clothing line and become a better buyer.

It will certainly pay you to order your clothing from us because we can positively furnish you better goods for your money than you can get anywhere else.

We particularly urge you to become a reader of our clothing portion of this catalogue, because we feel that we can show you wherein money can be saved, and wherein more satisfactory results can be accomplished by dealing with us in the custom tailoring line.

If you will investigate our method of transacting the tailoring business, you will find that we can save you a great deal of money. If you will send us one trial order, you will also find to your own satisfaction that we can furnish you much finer goods, better fitting garments, more satisfactory in every way than you can procure elsewhere, no matter what price you pay.

Clothing, either tailor made or ready made, is a line of merchandise which generally pays the manufacturer or dealer a big profit. They figure on getting a big profit in their clothing business. We figure directly the opposite. We can save you money on every line of merchandise, but we can save you more in proportion on clothing, possibly, than any one line, because we figure on making only the same one small profit in our clothing department as we do in any other line of merchandise. We feel that it is the business of everyone to become a good buyer; and to become a good buyer, it is absolutely necessary to be well posted on what you buy. Close comparison of the values we offer in tailor to order clothing with similar goods offered by other tailoring establishments, careful investigation of our tailoring department and the values offered, will convince any fair minded person that we are in a position to furnish finer tailoring, better workmanship and a finer and higher class of goods at much lower prices than any other tailoring establishment in this country.

OUR FALL AND WINTER LINE OF SUITINGS, TROUSERINGS, OVERCOATINGS, ETC.

Never in our clothing history have we been able to offer such an elegant assortment of fine up to date suitings, trouserings, overcoatings, etc., as are assembled in our Fall and Winter line. We believe that our customers want the finest goods there is woven. We have added this season a great many lines that we have heretofore thought too high priced for us to handle. We bring to our customers this fall and winter, the very latest and most desirable fabrics shown by both domestic and foreign woolen manufacturers. We show not only the finest goods woven, but we show the latest colorings, patterns that cannot be had from smaller tailoring houses, as they are shown only by exclusive city tailoring establishments at two or three times the prices we quote.

We make it possible for you to procure the very latest, up to date, exclusive late style suitings, etc., and at prices so very much lower than can be had elsewhere that you cannot afford to overlook the splendid values that we have to offer you. You will surely agree with us that you can make a much more satisfactory selection from our fine line of patterns than you could by purchasing anywhere else. In looking over our large sample book you get new ideas of what to wear and how to wear it. It is just as easy and just as economical to be well dressed, as it is to have ill fitting, old style and out of date garments. We make it possible for you to procure all that is best in the tailoring line. First, elegant, fine, pure woolen and worsted goods, newest, up to date patterns, large and varied assortment, that will be cut to your own special measure and made to your order, made in the latest and perfect fitting style, sewed throughout with silk and linen, honestly made and guaranteed in every particular. And, last, but not least, all this we offer you at lower prices than the same quality of goods is sold for by the average wholesale clothing house which makes ready made clothing.

GREAT MANY PEOPLE IMAGINE IT IS DIFFICULT TO TAKE THEIR OWN MEASURE.

Possibly thousands of men who are wearing ready made clothing today, would prefer to have garments cut to their measure and made to their order but they think it is necessary to have a tailor take their measure in order to get perfect fitting tailor made clothing. Or they have possibly sent away for clothing at some time and received unsatisfactory fitting garments. Numerous reasons keep them from taking advantage of the exceptional values in tailor made garments we have to offer.

Please bear in mind, that taking your own measure or having someone take your measure according to our system, is one of the easiest things in the world. It is just as easy as it can be to have your own measure taken, make out your order and send it to us, and get perfect fitting, satisfactory garments. You do not know how easy it is until you try. Just make out one trial order, just so to make a start, order a suit, coat and vest or single trousers, just enough to give it a trial. You absolutely take no chance whatsoever, because we guarantee to fit you, we guarantee that the goods will be made up satisfactory in every way. The garments will not only fit right, but they will wear longer, hold their perfect shape longer and give you more satisfaction than any other garments you ever procured at anywhere near the price. All that we ask is that you follow the instructions given on our order blank, give your correct measurements, height and weight, and we will guarantee to make you perfect, satisfactory fitting garments. Our system of detecting incorrect measures is perfect. Although we receive thousands of orders, it is seldom that we ever have a complaint of garments not fitting.

Please bear in mind that in sending us your order, we take all the chances. You take none. If the garments do not fit, if they are unsatisfactory in any way, either in quality, color, style, finish, texture; if for any reason whatsoever you are dissatisfied, we would prefer that you return the garments to us and your money will be sent back to you, if requested, immediately. Or, if you desire, we will make other garments for you, and in the event of the new garments proving other than satisfactory, you can return them to us, and in the end your money will be returned. In other words, we stand ready to follow your suggestions all along the line.

Do not let any excuse about wrong measurements keep you from sending us your order. Because others have not mastered this tailoring business, because you may have received unsatisfactory garments elsewhere, do not say that we are not in a position to give you all that we claim; do not say that you cannot get your measurements taken. We supply you with all the necessary articles, tape measure, order blank, instructions for self measurement—everything that you need to take your own measure. Anyone can take it, anyone who can read and write will take your measure just as accurately, as far as we are concerned, as any tailor can. Try it once, just once, and be convinced that we are in a position to serve your best interests in the tailoring line more satisfactory by far than you have any idea.

HOW OUR CLOTHING IS MADE.

One reason why we can and do guarantee our customers satisfactory tailoring is the fact that we control every portion of the work. There is not a single stitch of sewing in any of our goods that is not done under our own personal supervision and in our shops and factories. We control every portion of the work from the time the cloth leaves the loom to the finished garment packed up ready for shipment. We control the output of a great many woolen mills and are therefore in a position to furnish a superior quality of goods, and, of course, at a much lower price than the average house. The thousands of bolts of woolen and worsted goods received in our piece goods department during the summer season for the fall and winter business, are all carefully examined and double sponged in our sponging department, so that the possibility of defective material or goods shrinking after they are made up is entirely prevented. Every order received by us is handled separately, and entirely according to the specifications given by the customer. For example, your order comes to us for a suit of clothing or other garments and it is sent to our drafting department, where a special pattern is cut, according to your measurement and order, by an expert mechanic whose specialty is drafting patterns. The pattern is then sent to the cutter who cuts the garments from the material you select. After the garments are cut, the cloth is passed to a trimmer who cuts out and assembles the necessary trimmings and sends them along with the material to our tailoring department, where the garments are made up. Our tailoring department is divided into separate sections, one section making vests, the other coats, and another trousers. Each tailor works on his particular part of the garment. The vest tailor works on vests only, the coat tailor on coats, and the pants tailor on pants. They thus become experts in their particular line of work, are able to turn out more work, and at the same time a much superior class of work than a tailor who is a sort of jack of all trades and master of none. In other words, it is hardly possible to find any one tailor who can successfully make good work on coats and at the same time good work on vests. That is why we claim our tailoring is superior to that of the small establishments where they depend on one man being capable of all kinds of work. Special pains are taken in all of these various sections of our tailoring department to turn out the very best work possible. Our department for making men's coats is in charge of a man who is an expert in the manufacturing of fine custom tailoring coats, the sewing and pressing of our coats is done under his personal supervision. Every button, every part of the sewing, every portion of the work, is carefully watched so that we can turn out garments that will fit better and hold their lasting shape longer than the average custom coats usually to be had from tailoring houses at double our price.

Our custom pants department is in charge of a man who has a reputation in this market as being the best manufacturer of made to order trousers in the city. We guarantee every pair of pants shipped from our house against ripping, we guarantee them to fit perfectly, to hold their shape longer, to be more satisfactory than the usual custom trousers that you are in the habit of procuring elsewhere. We test the sewing, we examine the workmanship on every garment before it is shipped to you. We guarantee the buttons to stay on.

OUR LININGS AND TRIMMINGS.

A good house will not stand wear on a poor foundation, neither will good cloth, made up into clothing, unless good linings and trimmings are used for a foundation. **All of our coats are lined with a guaranteed quality Armitage or Rampion Mills Italian cloth, in color to match coat.** We guarantee all body linings to give satisfaction, and will replace, free of all expense to our customers, any defective or poor wearing linings.

To Whom it May Concern: New York, January 10.

Messrs. Sears, Roebuck & Co. use very large quantities of our celebrated quality "891" black imported coat linings, dyed and finished by George Armitage, Bradford, England, also our Rampion Mills "New Finish" linings. All of the goods we sell them are fully guaranteed. Our instructions to them are to replace, free of all cost to their customers, any defective or poor wearing linings used in their Tailoring Department.

Yours very truly, D. H. ARNOLD & CO.

All of our custom garments are stitched and sewed with pure dye silk. No better sewing silk can be had.

To Whom it May Concern: New York, January 5.

Messrs. Sears, Roebuck & Co. have purchased of us during the past year large quantities of our pure dye machine twist for use in their Custom Tailoring Department. The goods manufactured by us are of one grade, namely, absolutely pure dye, and are made of the very best raw silk obtainable, the result being that while the expense of our goods is greater to them than the cheaper grades, the garments made by this grade of goods are bound to give better satisfaction. Yours truly, HAMMOND, KNOWLTON & CO.

All coats are lined with a guaranteed quality of double warp Italian, hand padded collars, double warp silesia pocketing, best ivory or silk soutache buttons, silk tacks on all pockets, silk worked buttonholes. The inside work on our coats is where special pains is taken. A great deal of the work and material used in clothing is where you cannot see it.

We guarantee all of our coats to be interlined with our own patent interlining as shown to illustration. The interlining or coat fronts are made from linen canvas, hair cloth, padding, wadding, felt and sheeting, all cut and quilted together in a regular coat shape; also, taped all around to guard against fraying and insure lasting shape. Pockets are all double stayed with linen holland, also buttons and buttonholes stayed with a 3-inch strip of holland. A coat made up with our patent interlining will fit better, be more stylish and hold its perfect shape far better than any coat made by your local tailor.

For vests we use nothing but strictly high grade linings and trimmings; they are sewed throughout with silk and linen, and we believe from our tailoring department we turn out the best made and best fitting vests in the city. **In our custom pants we use very high grade pants linings, facings and trimmings,** strictly high grade reamed buttons, sateen drill pocketing, all sewed throughout with silk and linen, double sewed through crotch, guaranteed never to rip. If they do, send them back and we will replace with new work free of charge.

HOW TO TAKE MEASURES.

You don't know how easy it is until you try. Don't imagine because a tailor makes clothing that no one but a tailor can take your measure. Anyone can do it. **We take all the chances.**

If the garments don't fit you are not out one cent. We guarantee to fit and please you. If we do not, don't take the goods.

Our rules for self measurement are simple. Just follow the instructions given on tailoring order blank, or on back of general merchandise order blank, or, if you have no order blank, on a plain sheet of paper, give your measure, following printed instructions given below.

HEIGHT	WEIGHT	AGE

In taking measurements, the tape measure should be drawn moderately close, but never tight. To avoid error, take each measurement twice and write it in your order blank, before completing other measurements.

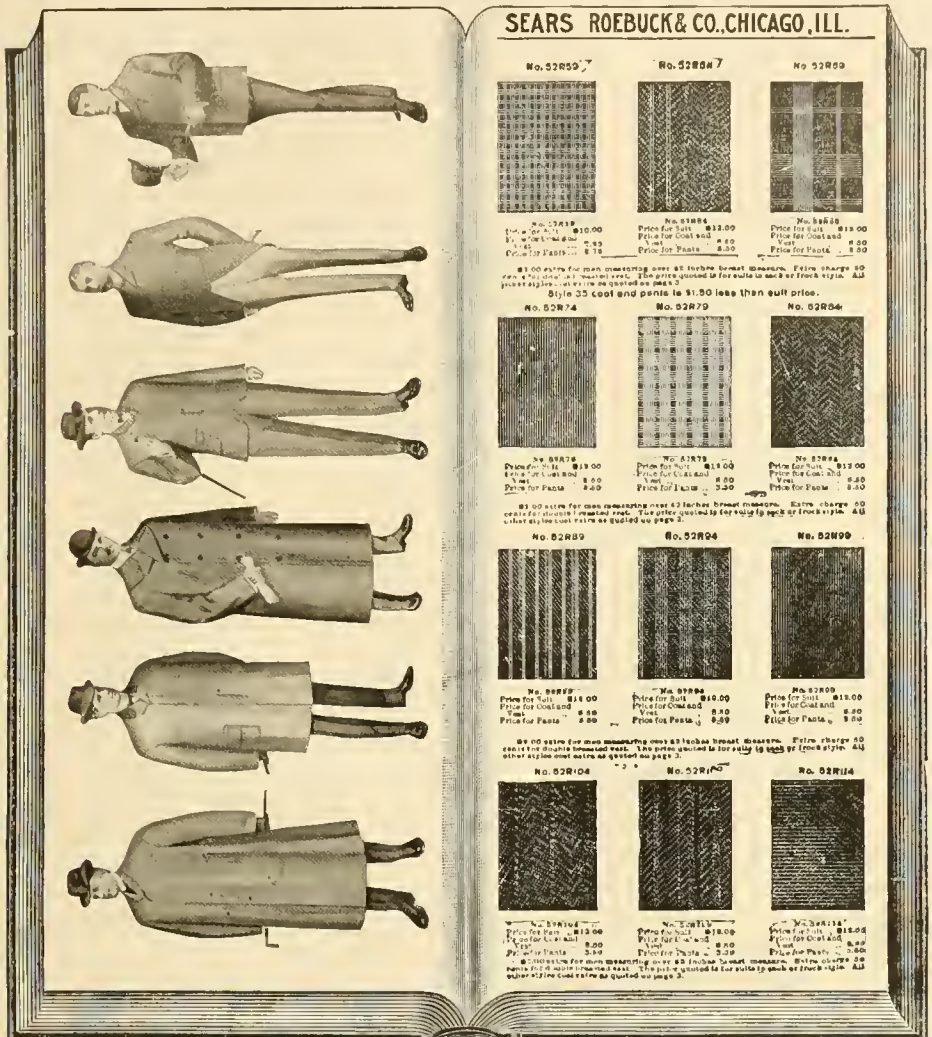
...OUR HANDSOME... CLOTH SAMPLE BOOK OF MEN'S CUSTOM TAILORING

MAILED FREE ON APPLICATION.

If you are interested in Fine Made to Order Clothing at about one-half the price usually charged, do not fail to SEND TO US FOR THIS BEAUTIFUL SAMPLE BOOK as illustrated on this page, and we will be very glad to mail it to you free of charge, postpaid, and with our compliments.



THIS ILLUSTRATION will give you some idea of the appearance of our new large, handsome, up to date complete sample book of fall and winter custom tailoring, containing over 100 cloth samples, the largest and most beautiful assortment of fine custom tailor suitings, overcoatings and trouserings, etc., ever shown by us or any other house, all at prices that defy competition, prices that are really a revelation for fine made to order clothing.

ON THE FOLLOWING PAGES we quote the kind of goods that we handle in this department, and the prices at which we make up the different garments, but we do not attempt to describe each kind of goods in this catalogue. We do not attempt to show how carefully and thoroughly our custom garments are made, for the reason that we prefer you to send for this free cloth sample book if you want a fine suit, overcoat, ulster, coat and vest, pair of pants, etc., or anything in fine clothing. We feel that it is much better for the customer if he wants a fine suit, overcoat or other garment, to first see the sample, as it will enable him to better judge the texture, coloring, weight, etc., and for this reason we do not urge our customers to order their tailor made clothing from this catalogue, but we ask everyone who is interested in fine made to order clothing to send to us for this complete cloth sample book. Of course, if you simply want a fine plain black or blue made to order suit or overcoat, you can order from this catalogue with every assurance of satisfaction. In fact, you can order made to measure garments in goods described in this catalogue and be assured that you will be satisfied; but we believe that it is safer all around for you to send to us for this complete sample book if you are interested and expect to buy any made to order clothing.

OUR NEW HANDSOME COMPLETE CLOTH SAMPLE BOOK of men's custom tailoring as illustrated hereon, is a booklet 6x12 inches in size in which is pasted a cloth sample of every fabric shown in our Tailoring Department. Under each sample is a full description of the cloth and the prices at which we make separate garments, suits, overcoats, ulsters, coat and vest, pants, etc. The book contains plain rules for self measurement, full instructions how to take measures, how to order, special order blanks, tape measure, etc., shows how anyone without any previous experience can take his own measure and be assured that the garments ordered will be perfect fitting.

THIS SAMPLE BOOK is not an ordinary clothing sample book, nor simply a sheet of paper containing a few samples, but it is a complete book containing over 100 samples, including every new and up to date style shown. It contains by far the best and largest assortment of fine late style suitings, overcoatings, trouserings, etc., ever shown by any concern. You will find in this booklet samples of the product of the best mills in this and foreign countries, the newest colorings, finest weaves and most superior quality and finish fabrics that it will be impossible for you to buy elsewhere. They will not be shown by wholesale tailoring houses.

YOU WILL FIND IN OUR SAMPLE BOOK many exclusive styles and patterns that are specially made and designed for us and of which we take the entire output. If you buy a suit or other garment from these goods, you can be assured that you will not find the same goods on sale in small clothing stores. You will have a suit different from anything you can get in your own town, a suit or other garment that will have a distinctiveness in style, material, make and finish, a perfect fit and a lasting shapeliness that is only equaled by garments made by the best large city tailors at two and three times our price.

IF YOU ARE NOT INTERESTED IN MADE TO ORDER CLOTHING, please do not send for this sample book, but if you intend to buy anything in the line of custom tailoring, if, for example, you have been buying ready made garments and want something that looks a little better, or if you have been having your clothing made to order and are dissatisfied with the prices you are paying, by all means send to us for this free and complete sample booklet. We know that if you will look over our goods and our styles, you will note our extremely low prices, our liberal terms, our guarantee of satisfaction, you will favor us with an order, and we know that if you allow us to make just one garment for you in our Custom Tailoring Department, we will receive your future orders.

WE OPERATE THE LARGEST CUSTOM TAILORING DEPARTMENT in this city. We make five times as many made to order garments as any other tailor in Chicago. With this enormous outlet for goods, we can contract for the output of several mills and we are able to reduce the cost of material to the lowest notch, and for this fall and winter through the growth of our custom tailoring department and our increased facilities, we are able to give our customers such values in fine goods as were never before offered by us or any other house.

DO NOT FAIL TO SEND for this new, up to date and complete cloth sample book of men's custom tailoring, if you are interested in this line.

WRITE US AND SAY: "Please send me your cloth sample book of men's custom tailoring," and we will immediately send you the new book with the fashion plates, rules for measurement, order blanks, tape measures, etc., by return mail postpaid. You can save so much money by ordering your clothing from us, we can give you such perfect fitting satisfactory garments in every way, that it is to your own interest to send to us for this booklet and then to send us your order.

MEN'S READY TO WEAR CLOTHING DEPARTMENT.

WE CLAIM TO BE IN A POSITION to furnish you better value and better made ready to wear clothing than any other wholesale manufacturer. Merchants and dealers all over the country should buy their ready made clothing from us, because they can get so much better value and service than other wholesale houses can give. As we have mentioned elsewhere in this catalogue, **clothing is a line of merchandise on which the manufacturer, the jobber and the retailer expect to get a good profit.** If you are a clothing dealer, we do not wish to cast any reflections on your manner of transacting business, but we know from experience that there is more profit in ready made clothing, or any kind of clothing, by selling it at a very narrow margin than by asking a large profit. Our business has been built up by furnishing better values than could be had anywhere else, **by selling honest goods at a percentage of profit as small as most manufacturers add to the net cost of their goods for selling expense alone.** In our ready made clothing department we recognize no competition, because there is no one that can meet our prices, as the advantage that we have over other manufacturers, is in disposing of our clothing at a very small cost, which places us in a position to undersell any other wholesale house in the clothing line, quality considered.

FOR THIS FALL AND WINTER we are in a position to offer our customers the best line of ready to wear clothing we have ever manufactured. There is not a number in the entire line but what is well made, made from good material. This season's ready to wear clothing is guaranteed to be the best value for the money ever shown by us. Our prices for the fall and winter season are very much lower than ever before. The make of our goods will be superior to anything we have heretofore turned out. We have added two large factories in order to keep pace with our increased trade in ready to wear clothing, and we are in a position this fall and winter to serve the best interest of everyone in the clothing line much more satisfactorily than ever before.

PLEASE BEAR IN MIND that our ready made clothing is all made in our own factory, the sponging of cloth, the cutting, trimming, tailoring, pressing, finishing, every part of the work is done in our own shops. We make up ready to wear clothing during the summer season, we make up thousands of garments of each lot that is listed in this catalogue, purchasing the material in immense quantities at the lowest possible price; in many cases we control the entire output of the mill, thus enabling us to procure the cloth at much lower prices than other wholesale houses; the linings, trimmings and everything that goes into our ready made garments is purchased at the lowest possible spot cash prices in very large quantities; all of the necessary material is assembled at a price figured certainly as low or lower than any other manufacturer owns his material. This material is made up into reliable, honest made garments at as low a figure as we can produce consistent with first class workmanship. We offer to our customers the finished goods at the actual net cost to make with just one small profit added. Does it not seem reasonable to you when we state that our prices, quality for quality, workmanship for workmanship, is less than you can procure similar goods from any other wholesale house, that our claim for better quality and lower prices than any other house is based on facts? We own our goods as low as any other manufacturer in the world. Instead of adding from 15 to 25 per cent profit to this net cost, as all other wholesale houses are obliged to in order to market their goods, **as they have to send out high salaried salesmen all over the country to sell their merchandise, which is never figured by any house at less than the actual cost of 10 per cent,** when we are able to ship you goods without any extra cost added at all for advertising or selling expenses, and instead of adding the usual 15 to 25 per cent profit, as is the usual margin of profit added by all manufacturers or wholesale houses, **we add just one small profit, thus it is reasonable that in placing your order with us you are getting better merchandise for your money than you will get anywhere else.** We solicit your orders for ready made clothing with the understanding that you get **better goods for less money** than you can procure elsewhere, that you will be better satisfied and that you can see a great saving in your purchase. We solicit your orders with the understanding that the goods will prove entirely satisfactory, that you will be perfectly satisfied with the material, workmanship, finish and the fit of the garments. **We guarantee everything to be right.** If you are dissatisfied in any way, please bear in mind that the goods may be returned to us at our expense and your money will be cheerfully refunded.

...STYLES...

Our ready made suits are made in Style 1 only (four-button round cut sack), as illustrations show; we cannot furnish any other style. Overcoats are made in single breasted style, fly front, velvet collar; cut on an average of 40 inches in length. Ready to wear ulsters are made with a large storm collar, two sliding ulster pockets, two lower outside pockets, and are cut on an average of 50 inches in length. We cannot furnish ready made ulsters any longer than 50 inches.

...SIZES...

We make ready to wear clothing only in what are termed regular sizes. All coats, overcoats and ulsters are made in sizes from 34 inches up to and including 42 inches breast measure; no larger or smaller can be had. Pants are made in sizes from 30 to 40 inches waist measure, and from 29 to 36 inches inside seam measure.

DO NOT order any larger or smaller sizes or any other styles than we have described above, as we cannot furnish them in ready made garments, and will only be compelled to delay your order.

If you desire any different style, or require different size, or if you are very tall, stout or short and very hard to fit, it will be advisable to make your selections from our custom tailoring line, and garments will have to be made to your special measure.

...HOW OUR READY TO WEAR CLOTHING IS MADE...

IN MAKING UP OUR READY TO WEAR CLOTHING, we aim to produce the neatest and most substantial garments possible. They are cut, made and trimmed in the latest prevailing style, all coats made in round cut sack style, lined with a good quality of Italian cloth; sateen sleeve lining. All coats are single stitched, have broad inside facings, two outside lower pockets, two inside pockets and one change pocket. Vests are made single breasted, five buttons and notched collar. Pants can be furnished with top or side pockets (state kind wanted); they have two hip pockets, one watch pocket and patent never come off buttons. Pants are cut according to the prevailing style worn this season, which is 18 inches at knee and 17 inches at the bottom for the smaller waists and 19 inches at knee and 18 inches at bottom for the larger sizes. Do not order pants larger at the knee or bottom than as above, as we cannot furnish them. Our overcoats and ulsters are made in the prevailing styles. The body and sleeves are lined with good quality black Italian cloth; coats are interlined with good quality canvas, well stayed, trimmed and finished first class throughout. All our ready made garments are made over the most perfect fitting patterns, and will fit better and retain their perfect shape longer than the average ready made garments to be had elsewhere.

If you want garments to fit, do not fail to give your correct height and weight.

HOW TO ORDER.

When ordering clothing of any kind be sure to give sample or catalogue number, state very plainly whether you desire suit, coat and vest or pants, and do not fail to give measurements, as we cannot fill your order if we have no measurements. If you have no order blank for ready made clothing, you may use our custom tailoring blank if at hand: if not, then carefully take the following measurements and put them on a sheet of paper:

COAT MEASURE—1st. Number of inches all the way around breast under the arms.
2d. Length of sleeve from center of back to elbow.
3d. Length of sleeve from center of back over elbow to wrist.
VEST MEASURE—4th. Breast measure same as for coat.
PANTS MEASURE—5th. Number of inches around body at waist.
6th. Length of leg from close up in crotch to heel of shoe.
OVERCOAT OR ULSTER MEASUREMENTS—Take these measurements exactly the same way as for undercoat.

NOTE—Be sure to take overcoat measurements with undercoat off, as a 38-inch overcoat is larger than a 38-inch undercoat, and we desire your correct measurements all the way around the breast with undercoat off.

They are important to us, as they confirm the correctness of your measurements.

CLOTHING IS A LINE OF GOODS on which nearly every tailor expects to make a large profit. It is a line of goods that a large profit is added to by every one who has had to do with it. From the manufacturer to the wholesaler, from the wholesaler to the jobber, from the jobber to the retailer and from the retailer to the consumer, each one gets his share of a liberal profit. But with us every profit is eliminated except the one small profit above the actual manufacturing cost, **and as a result our prices are from 30 to 50 per cent less than the prices at which the same goods are sold by the average retail dealer.**

WE ARE EXTREMELY ANXIOUS for you to have our **Cloth Sample Book of Men's Ready Made Clothing if you are interested in this department.** We feel that once you see our splendid line of fall and winter goods, we are sure of your order. It is by far the best line that we have gotten out and outclasses anything ever before attempted. **On standard well made ready to wear clothing our prices are below the wholesaler,** and if you will compare the fabrics shown in our Ready Made Clothing Sample Book with the goods shown by any retail clothier, you will find that on the same quality of goods his prices are almost half as much again as ours.

National Fancy Striped Worsted Pants, $2.00.

No. 45T33 At $2.00 we offer in this number the handsomest single pants we have ever been able to furnish. The pants are made from a heavy weight worsted material, dark shade, with an almost invisible stripe of dark green with a very fine white thread running through. A neat pattern, very closely woven material, something that will wear well. The face of the goods is all pure worsted, with a cotton and worsted mixed back, woven clear through and through, will retain color, and give equal service and satisfaction as goods that would ordinarily retail at double this price. Clothing merchants could not possibly get better pants to sell at retail. If our entire line of ready made clothing and ready made suits was placed in the average clothing store, the merchant who owns that store would find that he controlled the trade of his community, (providing he was willing to sell his goods at a reasonable profit). A foolish man, indeed, would he be who would pay $2.50 to $2.75 for the same quality of material that we use in these pants, and every merchant who buys from regular wholesale clothing houses is doing that very thing. Better change your method and order a few sample pants from us. Made up in sizes 30 to 40 inches waist measure, and 30 to 36 inches inseam measure.

Price, per pair.....$2.00

WE RECOGNIZE NO COMPETITION IN THE CLOTHING BUSINESS. We claim prices, quality for quality, workmanship for workmanship, are lower than those of any other house in the United States, wholesale or retail. To convince yourself that this statement is absolutely true, send for other samples, compare quality for quality, and place your order where your better judgment tells you you can get the best for the least. That is the only fair proposition. If others can give you equal value, then we are not the people for you to trade with. We do not expect your business unless we can give you better value. On this basis only do we solicit your patronage.

The business man who succeeds nowadays is the fellow who buys his goods where he can get the best quality for the least money. Competition is a little too keen for the old timer who continues to buy from some old house, regardless of the value received, year after year. He wonders why the other fellow is getting business. You may have good friends, you may have a large acquaintance, but you will have a mighty sight bigger trade by giving your customers better value than they can get from your competitor. Friendship doesn't cut much of a figure when it comes to paying you one or two dollars more for the same goods than they can be bought for elsewhere. We have about a million friends who are friendly to our clothing department because we give them better goods for their money than can be had anywhere else in the United States. You will become a better friend of yourself by sending for our large book of samples, showing the greatest values ever offered in ready to wear clothing. IF YOU ARE A CLOTHING DEALER OR GENERAL STOREKEEPER, it would certainly pay you to order a small line of our ready made suits and single pants. There is no name on our goods, simply because a great many merchants purchase from us and they do not want their customers to know where the garments come from. **WE DO NOT BLAME THEM.** If you order a line of our goods, we are sure you will have great success with them. If our ready to wear clothing is sold to you at 15 to 25 per cent less than you can buy it from any other wholesale house, then doesn't it seem reasonable that, as long as you are going to sell ready made clothing, you would have greater success with our goods? Just a few sample orders will convince you as to whether we are right or wrong.

Our judgment would be to try it, and if the value we offer in this or any other number is not just what we claim, the merchant could send the goods back to us at our expense and we would refund his money. The trial would cost him nothing and it would convince him that we are either dishonest in our advertising, or he is paying too much for his goods. IT IS MIGHTY EASY TO TALK OF VALUES; anyone can do it. We have to make strong representations to interest you. What good would the representations do unless our goods were behind us to back up every statement we make? This is the trouble with lots of advertisers today. They make a great hurrah about values; but when it comes to a show down, their values are inflated. When we take the entire responsibility of our clothing being satisfactory, when we guarantee the values to be exactly as represented, style, fit, finish, workmanship, everything just as we claim, or your money returned with any expense you have been put to in placing your order with us, it doesn't seem as if there was any loophole (if there is, we want to cover that, too), we don't want our customers to take one single chance of getting unsatisfactory goods. They don't have to.

WHILE WE URGE YOU TO SEND FOR OUR SAMPLE BOOKS we urge you just as hard to return to us any unsatisfactory wearing garments, poor fitting garments, anything that is not right that you receive from our house. We want you to send it back. You will be a better friend of ours and better friend to yourself by dealing with us on the wide open policy of furnishing better goods for less money than any other house in the United States.

WE DO NOT BELIEVE IN KEEPING OUR LIGHT HID UNDER A BUSHEL. IF WE DO NOT ADVERTISE, HOW COULD WE EXPECT TO GET YOU INTERESTED IN OUR CLOTHING LINE?

While the best advertising that we have is the clothing that we ship, we want to get you interested in our clothing line just enough to get these excellent values which we have to offer before you. Our Sample Book of Ready Made Clothing will do this. Send today; ask for Sample Book of Ready Made Clothing and it will be mailed to you postpaid.

Bargain Page of Odds and Ends in Men's Ready Made Clothing.

FROM THIS PAGE YOU CAN BUY CLOTHING AT ONE-HALF PRICE AND LESS.

Transacting such an enormous business as we do in our custom tailoring department, also in our ready made clothing department, we always have garments left over or ends of goods on hand which we cannot sample any more. Instead of selling these odds and ends to jobbers we are always anxious that our customers should reap the benefit of any special values that we may have to offer. Therefore, all remnants that we have left over from our high priced clothing we cut up and make whatever garments we can from them, the smallest pieces we use for single vests, the large ones we make into single pants, single coats, coats and vests and where quantity is sufficient we make complete suits in various styles. We do not want to make any profit on these goods whatsoever, but our object is to give our customers the benefit of same and all we expect to get out of these lots is the actual cost to manufacture them. For this reason, when ordering from this page you are positively getting more for your money than you expect. Understand, we do not guarantee to furnish you any certain goods, style or color, but we do guarantee to give you better value for your money than you expect to get. When ordering from these lots give us an idea what style of coat or goods you desire and we will fill your order as near as possible. When ordering coats give first, second and third choice for style, so that in case we cannot give first choice we don't have to delay order. When ordering from suit lots it may happen that pants belonging to coat and vest are not your size, and therefore it would be useless to send same; therefore, in cases of this kind we reserve the right to send you coat and vest of one and pants of another kind. Whenever we do send broken suits like this, we always see that colors harmonize. Remember that these garments are ready made; they are all cut and made according to prevailing styles.

Do not hesitate, but order at once, as you will get a better pick from this lot than later on. Give us an idea what style and material you want and we will give your order our best attention. We will always try to send complete suits from these lots, but should the pants not be your size we will send coat and vest of one kind and pants of another. BOYS' AND CHILDREN'S READY MADE CLOTHING.

THE ENORMOUS INCREASE in our boys' and children's clothing business during the past year is the best evidence we can offer to substantiate our claim that we are able to furnish our customers better made and better quality of garments for their money than they can possibly procure elsewhere.

WE HAVE A LARGE, clean and strictly up to date clothing factory of our own, and make all our own boys' and children's clothing. The large quantities of woolen and trimmings we consume enables our buyers to obtain these materials at the most favorable terms possible, and we follow the long established rule of our house to give customers the benefit of all such advantages, a certain small percentage of profit only on all articles being retained.

EXCEPTIONAL PAINS ARE TAKEN in selecting honest made materials, in carefully matching trimmings, buttons, etc., and in guarding against the omission of any of the many little details necessary to be observed in order to produce a perfect garment.

IN COMPARING OUR GOODS AND PRICES with others, you will find many special features in our make which greatly add to their value and should be taken into consideration.

THE COATS of all suits are made double stitched, deep facing; sewed to the inside facing of the coat will be found extra buttons to be used in case one or more should be lost or broken before the suit is worn out. All coats are interlined with canvas. Knee pants are all made double seat and double knees, patent elastic waistband, taped and double sewed through crotch and seat. Three pockets in all knee pants, two side and one hip. All pants of vestee or Norfolk suits are made closed front; all pants of boys' two or three-piece knee pants suits, for boys age 8 to 15, are made open or fly front; patent buttons on fly. All garments are carefully made and are examined before leaving our factory.

WE BELIEVE OUR BOYS' AND CHILDREN'S CLOTHING to be the best fitting and most durable clothing on the market, and solicit your trial order with the understanding that, if you do not agree with us, you are at liberty to return the goods entirely at our expense and receive your money back. Could there be a fairer offer?

SIZE, STYLE AND MEASUREMENTS. To avoid delay and correspondence, please give the information on size, styles and measurements careful consideration. Our boys' and children's clothing is already made up. We cannot furnish any larger or smaller size than is plainly stated below each description. We cannot furnish any different style than the one described for each number. A careful consideration of the schedule given of how our long pants suits are cut will greatly assist you in selecting the proper size required. Coat sleeve length is taken from center of back to wrist bone.

The weight and chest measure are for an average sized boy of his age. A 14-year-old boy may measure 32 chest and require an age 16 suit. By comparing the chest measure and weight, this schedule is an excellent guide in selecting the correct age suit required.

A WORD TO THE RETAIL CLOTHING DEALER.

WE KNOW THAT ANY CLOTHING DEALER or anyone experienced in handling boys' and children's clothing, when reading our descriptions of these boys' and children's goods, and noting our low prices, might question our ability to really furnish such values in the clothing line.

WE WILL ADMIT that our representations, and these descriptions of boys' and children's clothing at the prices we quote, may seem highly colored to any dealer who knows what such goods usually cost at wholesale, but to any dealer or other party who feels inclined to doubt our ability to furnish such values, we would say that we will be more than pleased to have them order anything in the line of boys' and children's clothing, and if they are not wonderfully surprised at our values, if the goods are not just as good or even better than we represent, we stand ready to refund the money without any question or argument, including what was paid for transportation charges.

WE KNOW THAT WE ARE TODAY FURNISHING THE VERY BEST VALUES in boys' and children's clothing of any dealer or manufacturer in the United States. We know that our prices are so low that we are warranted in asking retail merchants for their business, for we know that we can offer them inducements in the way of lower prices over what they can get from their wholesaler or manufacturer. How much greater, then, is the saving we can offer the purchaser who buys these goods for his own use and not for sale.

While you may find cheaper suits offered, you will find that they are made of satinette or shoddy goods which are dear at any price. The material we use is a good weight, wool and cotton mixed cheviot, in a gray and black check, relieved by a faint overplaid, formed by blue and green lines. Coat is made in round cut sack style only. Vest, five-button single breasted. The pants are cut in the most prevailing width, have two side pockets, one hip and one watch pocket.

Oakland Manufacturing Co.'s Heavy Weight Cassimere Suit, $4.00.

THIS SUIT IS MADE IN A NEAT BROKEN CHECK PATTERN, IN DARK BROWN, GRAY AND BLUE COLORS, and makes a splendid suit for every day wear. We guarantee it to hold its color and give splendid service, and would especially recommend it for a comfortable every day suit; and we do not think that we are exaggerating if we say that for a suit of similar material any first class wholesale house would get $5.00, and a comparison will show a good many little points in our favor if the general make up is considered. Coat is made in round cut sack style, substantially lined, double stitched all round and provided with extra buttons. Vest is made single breasted, with notched collar and five buttons. Pants are double sewed in crotch, have side pockets, hip and watch pockets.

Mackintosh, Taft & McKenna's All Wool Heavy Weight Melton Suit, $4.50.

THE PHENOMENAL SUCCESS WE HAVE HAD WITH SIMILAR MATERIAL IN PAST SEASONS has induced us to contract for an extra large quantity of piece goods of this kind, which of course means better terms for the raw material, and we are therefore able to offer the suit to our customers at a lower figure than ever before, a figure which bars all competition. The color of the goods is a solid mixture of black, olive and red, and for a warm, dressy winter suit it cannot be beaten at the price. The suit is made up in round cut sack style with five-button single breasted vest, substantially lined and trimmed, and, in fact, every effort has been made to make it a perfect suit in every respect.

No. 40T704 Price for boys' long pants suit, style 1, with single breasted vest.....$4.50

Bauendahl's Heavy Weight Navy Blue Cheviot Suit, $5.00.

THIS POPULAR MATERIAL FOR BOYS' AND CHILDREN'S CLOTHING needs but little description. It is a clear dark navy blue heavy weight fabric, strictly all wool. The price at which we offer the suit is much lower than is usually asked for suits of this material and there is but a very small profit for us, but we know that if we receive your order for it, it will mean a good many more orders for us, as you will be sure to call the attention of your neighbors and friends to its extra good value. The coat is made like our style 1, a round cut sack coat, lined with a good quality of black Italian body lining, extra strong sleeve lining, double stitched edges and deep facings. We put extra buttons on inside of facing to replace any which may become lost or broken. Vest is made with five buttons, single breasted style, a notched collar, four outside and one inside pocket. Pants are trimmed with a good quality of skirt lining, have side pockets, two hip and one watch pocket.

Schaefer, Schramm & Vogel's Fancy Mixed Cheviot Suit, $5.00.

THE MATERIAL WE USE FOR THIS SUIT IS A GOOD WEIGHT ALL WOOL CHEVIOT in a broken check effect, a black, dark green and gray mixture, interwoven with an occasional single thread of red. We know that if you favor us with an order for this suit, you will wonder how it is possible to get up such a handsome suit for so little money. We were surprised ourselves when the mill accepted the price we offered for a quantity of this splendid material, which enables us to put the price of the suit at the figure stated. The suit is made in round cut sack style with a single breasted vest, well lined and tailored throughout, and without exception the best $5.00 suit ever offered.

No. 40T710 Price for boys' long pants suit in round cut sack coat with single breasted vest.....**$5.00**

No. 40T712 FANCY MIXED CHEVIOT SUIT, same material as No. 40T710. The price for boys' long pants suit in square cut sack coat and single breasted vest.....**$5.00**

To give those who prefer a coat made with square corners, like the style 2, a chance to obtain a suit of the excellent material described under No. 40T710, we have made up a lot of the same goods in that style. With the exception of the cut of the coat, the suit is made exactly as No. 40T710, but be sure to order No. 40T712 if you desire a square cut coat.

Holmes & Co.'s Fancy Cheviot Suit, $5.00.

THE MATERIAL FOR THIS SUIT IS SOMETHING ENTIRELY NEW IN THE BOYS' CLOTHING LINE, and as it is our aim to furnish our customers the very latest patterns without the extra charge which is usually made by manufacturers for any little novelty, we have made the price nearly 50 per cent lower than a suit of this material is shown elsewhere. The color of the goods is dark blue with an alternating green and brown striped effect. We have only been able to secure a very limited quantity of this material and if you desire a handsome, strictly up to date suit for your boy, we would advise you to order early. We have made the suit up in round cut sack style, with a double breasted vest of the latest style without collar. Like all our boys' clothing, the suit is made to stand hard wear and at the same time give the most dressy appearance possible. We feel confident that a trial order for one of these suits will result in your becoming a steady customer of our boys' clothing department.

T. W. Fitheau & Co.'s Drab Corduroy Suit, $5.50.

THIS SUIT IS MADE FROM PURE DYE DARK DRAB CORDUROY, the same quality which is usually offered at about double the price. We know that boys are hard on clothing and therefor use the greatest of care in selecting materials of the strongest kind. Had we not been able to secure a large quantity of corduroy at an exceptionally low figure, we would not attempt to offer a suit at $5.50, because a poor corduroy is of no value. As it is, we would like you to compare this suit with suits of similar material shown by wholesale houses at one-third more and we think that you will agree with us that the purchase of our suit will mean a saving of a five dollar bill to you. Coat of the suit is made in round cut sack style, vest, five-button, single breasted, with notched collar.

All Wool Black Clay Worsted Suit, $6.00.

THIS SUIT IS MADE FROM A GOOD WEIGHT AND A GOOD QUALITY OF CLAY WORSTED. There are always a great variety of black clay worsteds on the market and you will probably find some suits offered cheaper than this suit, but, if you examine them you will find them made for the greater part of cotton and they will fade in no time. Such suits are dear in the end. We believe in using only the best materials for our boys' clothing, as they are generally subjected to much harder wear than those for men and select our piece goods accordingly. The suit we offer is strictly all wool, and we guarantee it not to fade or lose its shape. The coat is made in round cut sack style, the vest single breasted, with five buttons and notched collar and the pants are cut in the newest prevailing style for youths.

Special Value Two-piece Suit, $2.50.

Under this number we offer boys' two-piece suits of exceptional good value, for the reason that they are made up from small ends left over in our custom tailoring department. To avoid accumulation of small lots of piece goods, it has always been our custom to dispose of them to jobbers at the end of each season at whatever we could get for them, and generally at considerable loss. It occurred to us that we could benefit our customers as well as ourselves by making them up into suits. We have a large variety of neat patterns, some in worsteds and some in cassimeres and cheviots. Give us an idea of about the color and material you desire and let us make a selection for you. We feel confident that you will easily recognize the exceptional value and be well pleased The suits are thoroughly well trimmed and tailored. Pants are made with double seat and double knees.

This suit we consider one of the strongest and best wearing garments in our line. We should call it our "Can't-wear-out-suit," were it not that so many cheap and almost worthless suits are advertised under that name. We think, however, that you will give it that name if your neighbor asks you what you think of it, and your recommendation will be better than any we could give it. The color is dark gray with a broken check of light gray and relieved by occasional red and green threads. If you want a warm and dressy school suit, and one that will outwear any suit your boy ever had, we would advise you to order this number. For style of the suit see opposite illustration, it is made just like it. In making the suit up, we have made every possible effort to turn out a durable garment in every respect.

STYLE B44

WE SHOW A BETTER AND MORE COMPLETE LINE OF BOYS' OVERCOATS AND ULSTERS THAN EVER BEFORE. All our coats are made in our own large factory and are cut in the latest and most popular styles of the season. On this page you will find a group of styles in which our coats are made and under each number we state the style in which the garment is made. Please do not order other styles than those quoted for each number, as we cannot furnish them, and it will only necessitate correspondence and consequent annoyance to you. All our overcoats and ulsters are made in sizes to fit average size boys from 12 to 19 years of age, 28 inches chest measure is the smallest and 35 inches the largest we can furnish. If your boy measures over 35 inches around the breast he requires a man's coat and we cannot fit him from boy's ready made clothing. In ordering overcoats or ulsters take measure exactly the same as for undercoats. If your boy wears a size 33 undercoat he requires the same size overcoat, allowance being made in cutting overcoats so that they will fit over undercoats of the same size.

FUR COAT DEPARTMENT.

WE OPERATE ONE OF THE LARGEST FUR COAT FACTORIES

in the United States. We make up thousands of fur coats in the spring and summer season and have them on hand ready for shipment when our customers need them. Our fur coat factory is run on an economic basis. The raw material is purchased in immense quantities at the lowest possible market price. Our fur coats are made as good as is possible to produce with good material and first class workmanship. **We are in a position to sell fur coats, quality considered, for less money than any other house in existence. Many dealers all over the United States where fur coats are used extensively, are buying from us.** Why? Simply because they can get any number of coats, one or a dozen at a time, any size they may desire and for less money than the same coat can be purchased from regular fur coat manufacturers. Fur coats is a line of merchandise that runs into money. It takes considerable capital to place in stock even a fair assortment of fur coats. Why should you pay more money for your goods elsewhere and run the chances of carrying over several hundred dollars worth of stock that depreciates as a usual thing, in value? We guarantee to meet the prices of any fur coat manufacturer of the United States, and furnish the very best goods possible to make, or we guarantee to beat the prices, qualities, and workmanship on equal basis. If you can get a fur coat from us for less money than from any other dealer, manufacturer, or jobber, we believe that we are entitled to your trade. We make it possible for you to purchase at the actual cost to manufacture, with but one small profit added. You may ask why we can afford to sell fur coats for less profit than any other manufacturer. In answer we claim that our selling expense is at least 10 per cent lower than that of any other manufacturer of fur coats in this country. We sell thousands of fur coats each season, we have all the advantages of any other large manufacturer, in buying the raw material in very large quantities; we have the advantages of all the latest perfected machinery and the best tailors; we can procure skilled workman in this line as we are located right in the midst of the fur coat industry. Instead of sending out high salaried salesmen to sell our goods, our business comes direct from this catalogue, therefore our selling expense is next to nothing. It is a well known fact that the selling of fur coats by traveling salesmen throughout the country is very expensive. Every fur coat manufacturer will tell you, if he tells you the truth, that it costs him on an average from 10 to 12 per cent to place his goods on the market. Again, a fur coat manufacturer who depends on the output of his factory only, who has no other class of merchandise on which he may depend for his profit, must necessarily derive a larger margin of profit than a house who is doing millions of dollars yearly in other lines of merchandise.

WE STARTED OUR FUR COAT FACTORIES

four years ago to enable us to furnish our customers with the very best goods possible to produce at the lowest possible price. The volume of business transacted each season has been larger than the previous year. We have been guided by our last and previous year's business and we have to offer our trade for this fall and winter season, the best assortment of fur coats ever placed on the market, at prices which absolutely defy competition. By making the largest cash purchase on record of raw skins and all the necessary materials used in the construction of fur coats by tanning, blending, matching, cutting and making up this material into the very best fur coats that skilled labor can produce, under the personal supervision of an expert fur coat maker, and offering the best guaranteed, perfectly finished garments direct from our factory with but one small profit added, we claim the right to expect the order of every reader of this catalogue who wants a fur coat for his own use or who may desire to sell them to his customers at a profit.

WE MAKE IT IMPOSSIBLE

for you to get a poor coat from us, by sending you a new one if by any chance the coat you receive should prove unsatisfactory. We are the only house we know of who absolutely guarantees fur coats for general wear and satisfaction. Attached to the inside lining of every fur coat is our binding guarantee for one year from date of sale, offering to replace or repair, free of charge, any defective or poor wearing fur coat.

HOW OUR FUR COATS ARE MADE.

THE INSIDE MAKE OF A FUR COAT

is where considerable expense comes in. It can either be slighted or made well. There can be a difference of from $2.00 to $5.00 on the make alone of a fur coat. The extra work and caution is one feature which makes our coats better than other makes. All of our fur coats are made with a six inch larger skirt sweep than any other coat that we have ever examined. They are cut large, full length and are more comfortable and better fur coats than can be had from the majority of fur coat manufacturers. Before any skins are cut they are tested for strength and durability All imperfect skins are thrown out and sold to dealers who make up very cheap fur coats such as we do not make or handle. Every coat is double sewed throughout, edges are all stayed and double sewed. Many of our coats are faced with an eight-inch strip of duck with three rows of linen sewing on edge of coat. Nine-tenths of the work of a fur coat is where you cannot see it. The inside of the coat is where we take special pains, and on this side of the coat are we able to give a special guarantee against ripping.

SIZES ON MEN'S FUR COATS

run from 36 to 46 inches breast measure. Our coats are cut full size and run full 52 inches in length. Fur coats should not be worn tight. **When ordering be sure to give your correct height and weight, also the correct measurement around chest, under arms, over the coat that you expect to wear with the fur coat.** Sizes larger than 46 inches chest measure we term extra sizes, and we make up all extra sizes to special order, for which we charge extra according to the quality of the goods and size ordered. If you cannot wear a 46-inch breast measure, please let us know the kind of a coat you wish to order, and the size desired, and we will take pleasure in quoting you special prices.

Our $16.00 Extra Silver Wombat Coat.

No. 41T301 The Wombat coats have been worn extensively, they are well and favorably known as the best wearing and warmest fur coat manufactured. They are plain, durable and fine appearing dress fur coats. Some manufacturers try to imitate genuine Wombat coats by using colored sheepskin. This has in some localities hurt the sale of the genuine Wombat. This coat is made from genuine Wombat, from an extra good quality called Silver Wombat. Exclusive dealers in fur goods would ask you $20.00 to $22.00 for this genuine wombat coat. No better wearing coat was ever placed on the market than this number for the money. It is an extraordinary good value, we cannot recommend it too highly. Double sewed throughout, the body is lined with heavy serge quilted lining, sleeves are lined with iron cloth, leather arm shields, has woolen woven wind excluding wristlets on cuffs, loops and buttons, plain collar and cuffs, as shown in opposite illustration. Jet Black Curly Dog Coat for $20.00

No. 41T306 This coat is not an ordinary black dog coat. We are not partial to plain black dogskin coats, such as are sold throughout the country at from $12.00 to $15.00, simply because they are not desirable fur coats for the money. This coat is made from jet black curly dogskin. They are domestic skins, and the coat when made up has the appearance of a much finer and higher priced coat than you would expect from a fur coat advertised as a dogskin coat. It does not in any way resemble the ordinary dog coats, any closer than our black Galloway coat does a common goatskin. This coat is made from jet black curly dogskin, carefully selected, finely matched, thoroughly deodorized, no offensive smell, such as is characteristic of the original plain black straight haired dogskin coats. It is one of the handsomest and best wearing coats in our line. Made with perfectly plain collar and cuffs, quilted Italian lined, leather arm shields, loops and buttons; guaranteed for one year from date of sale.

No. 41T308

Our $18.00 Jet Black Galloway Calf Coat.

No. 41T304 As a leader, there are few manufacturers who are placing a Galloway on the market this season at $18.00. The Galloway calf coat that some manufacturers show at this price is made from the very lightest skins, and is not a satisfactory fur coat for anyone to wear or handle. We claim our jet black Galloway calf coat is positively the best value on top of earth for $18.00. The coat is made from jet black Galloway calfskin, cut very full size, skins carefully selected and matched, is double sewed throughout, lined with an extra good quality of serge or quilted Italian lining, loops and buttons, plain collar and sleeves extra well stayed and finished. If you are a merchant and want to offer your customers better value than your competitors, you can order this coat from us and get any quantity you want, either one or a dozen, you can send the orders to us as fast as you sell the coats and you will not only do a larger business than any other merchant in your town, but you will give your customers better value than they can get elsewhere and do so without carrying a large stock of coats. We have manufactured this, our finest quality of silver wombat, with the idea of giving our customers a better and more superior silver wombat coat than is offered by any of their manufacturers. RACCOONSKIN COATS.

RACCOONSKIN COATS are naturally popular, high priced fur coats. They always have been and we presume will be until the price is so high that they will be beyond the reach of everyone except the very wealthy. Raccoonskin coats have advanced in price from last year about 20 per cent, the probabilities are that there will be another advance this next season. We can only recommend raccoon coats for wear, comfort and a desirable coat to purchase. The price asked for raccoonskins at the present time is so high that we cannot recommend our customers to wear or buy a raccoonskin coat if they are looking simply for the best wearing coat, as the cheaper grades offered in this catalogue are equally as desirable as far as wear, warmth and general satisfaction is concerned. The raccoonskin coats we have to offer are made from the best selected stock. They are not the ordinary light Southern skins, such as can be furnished at a little less money by some dealers. If you are going to buy a raccoon coat, it is cheaper by far to get a good one even if it costs you $10.00 to $15.00 more because it will in the long run pay you to get the best article.

X Quality Plain Raccoonskin Coat, $30.00.

No. 41T316 We recommend you to buy better made raccoon coats. We guarantee this coat to be all that we claim. SHEEP LINED DUCK CLOTHING.

WE CLAIM TO FURNISH sheep lined duck clothing for less money than you can possibly purchase from any other manufacturer in the United States. We pay special attention to the make, and there is not a single garment turned out of our factory, but what we can absolutely guarantee for wear, and we do guarantee any duck or sheep lined coat purchased from us to give satisfaction. Any coat received from us that is not perfectly satisfactory can be returned and we will either exchange for a new garment or refund money, as desired.

MERCHANTS CANNOT DO BETTER than to order their duck and sheep lined clothing from us. They can always depend upon getting any size desired and in any quantity, and by keeping a limited stock on hand and ordering of us from time to time, will always have just the sizes their customers may wish. As our name does not appear on any garments we sell or on any package or case that goes from our house, it is very easy for merchants to order from us. We solicit a trial order for any number, with the understanding that the garments will be better made, of better quality, better value and altogether more satisfactory than can be had from any so-called jobber or duck coat manufacturer.

WE MAKE SHEEP LINED DUCK CLOTHING in connection with our duck coat factory. We have to offer this season the best and most satisfactory line of goods that we have ever gotten out. The same applies to sheep lined duck or fur coats as well as to any other line of goods of a similar nature, namely, that you can get inferior or third quality goods at very low prices, and it would be possible for us to offer sheep or duck lined coats on paper at a much lower figure than we do, but the goods would not give satisfaction. Every duck or sheep lined coat that we offer is made from the exact quality of duck as claimed in our description. They are cut full size, lined with the best quality of lining, double sewed throughout and, as above mentioned, guaranteed to you in every respect. You have everything to gain and nothing to lose by placing your order with us.

THE AVERAGE MANUFACTURER who makes only duck coats has to add to his original cost from 15 to 20 per cent to sell his goods. By sending out high salaried salesmen and showing samples all over the country, he cannot figure on disposing of his product for any less than 15 or 20 per cent. It stands to reason that we can and do furnish just as good goods as anyone can make and at lower prices than anyone else can afford to quote.

SIZES. Our sheep lined clothing is made in sizes 36 to 46 inches breast measure. Any size larger than 47 inches breast measure will have to be made to order, for which we make an additional charge of 50 cents, which is the actual cost to us for so doing.

WHEN ORDERING sheep pelt lined clothing be sure and give us your exact breast measurement, to be taken over the garment which you expect to wear the coat ordered. Also give us your accurate height and weight, and we will send you a coat that will fit.

MEN'S AND BOYS' OVERALLS, WORKING PANTS AND JACKETS.

IN THIS DEPARTMENT WE CAN SAVE YOU MONEY. We make up all of our overalls, jackets, etc., in connection with our duck coat factory. Every garment is cut full size from the latest and most perfect fitting patterns. We have started our duck coat and overalls factory with a view of serving our customers with the very best class of goods at prices at least 33 per cent lower than the same grade can be gotten elsewhere. Our increase of trade in this department shows that our customers appreciate a venture that affords such a saving on staple merchandise. When ordering other goods you cannot afford to omit at least a year's supply of overalls and jackets; you will save what we gain over other dealers by making our own goods. We will give any assortment of sizes wanted in dozen lots. We furnish all waist measurements, 30, 32, 34, 36, 38, 40, 42, 44, and the following sizes inside seam measure: 30, 31, 32, 33, 34, 35, 36. Any size larger than 44 inches waist measure, or longer than 36 inches inseam will cost extra, as follows: 25 cents on all overalls quoted at 50 cents or more in price, and 10 cents extra on all overalls quoted below 50 cents in price.

MEASUREMENTS. Give waist measure and inseam measure the same as for regular pants; always give waist measure first. Some of our customers order overalls as follows: One pair of overalls, 32x34, and expect to receive 34 waist and 32 inside seam, which they would not get. The order should read: One pair of overalls 34x32; waist measure should always be mentioned first; the best way is to state "waist 34 and inside seam 32" and thus avoid any possibility of mistake.

LAXETTE WATERPROOF CLOTH GARMENTS.

THE NEW WATERPROOF LAXETTE COATS are fast becoming the popular waterproof garment, which is only natural, as this cloth makes a rain-coat for wet weather, a dress spring and fall overcoat for nice weather, a coat that can be worn at any time or place in nearly all climates with perfect comfort and satisfaction to the wearer.

WHAT IS LAXETTE CLOTH. It is an all wool material in a medium weight goods, suitable for a waterproof coat or a spring and fall overcoat. The cloth is treated by a new chemical solution which renders the surface as well as each fiber of the fabric waterproof to the extent that it will withstand any ordinary rain. This treatment in no way affects the appearance, quality or texture of the material. No one would be able to distinguish the difference between two pieces of goods, one waterproofed by this new Laxette treatment, the other untreated, yet the treated cloth would be water repellent. In introducing this new waterproof cloth we wish to say that we have fully investigated its merits. If our customers will order these coats and use them for just the kind of wear for which they are intended, everyone getting a Laxette garment will surely proclaim the merits of this goods as a dress waterproof coat, a spring and fall overcoat, a splendid wearing dressy waterproof garment suitable for all kinds of reasonable wear; not intended or suitable for very heavy, rough usage in such work as teaming, lumbering, heavy farm work, etc., where a slicker or heavy gum or duck coat would be better adapted. With the exception of No. 27T150 coat at $5.00, we make men's Laxette waterproof coats to special order. We make them in our own tailoring department after your order is received, according to the measurements sent us. We thus furnish in this line perfect fitting, up to date garments in either of the two styles illustrated below. To introduce these new Laxette garments we will mail free of expense samples of the fabric. (Ask for samples of Laxette waterproof coats.) **Remember these coats are medium weight and have no body lining and are worn very loose and baggy.**

MEASUREMENTS. Use one of our regular tailoring order blanks, for measurement should be taken exactly the same as for overcoat or mackintosh. We will make garment the proper length according to your height, which should always be given, also weight. Laxette coats should be made from 46 to 52 inches long, depending on the height of the wearer.

MACKINTOSHES.

QUALITY AND PRICE.

Our prices on mackintoshes are the lowest ever quoted by any house selling direct to the consumer. When you purchase a mackintosh from us you usually pay less than your local merchant can buy them for in quantities, and in no instance do you pay more. **Every mackintosh sold by us represents the best that can possibly be made for the price.** A fine or high grade mackintosh of course will give better and more lasting service than a cheap or ordinary coat. We, therefore, recommend in particular our better grades, but all the low priced mackintoshes quoted by us will give reasonable satisfaction in every instance, and in order to get the best results we append herewith, a few rules or suggestions by which the wearer will invariably obtain entire satisfaction.

HOW TO GET THE BEST RESULTS FROM A MACKINTOSH.

Don't clean with gasoline. Use cold water only.

Don't hang next to a chimney or fireplace. When convenient spread out the coat to dry.

Don't fold up and put under a wagon seat when wet. We warrant our mackintoshes to give entire satisfaction, but cannot warrant against abuse.

Avoid getting oil or grease on your garment, because it will in time separate the two textures, eventually causing garment to leak.

Dampness in Shoulders and Back.

Do not immediately jump at the conclusion that your mackintosh leaks if the lining of the mackintosh should become moist on the inside up about the shoulders and back. This condition almost invariably obtains because the mackintosh cloth is not porous as is other clothing, permitting ventilation, and it therefore causes some condensation of air, which makes the mackintosh lining damp or the coat worn underneath sometimes quite moist.

Loose Fitting Mackintoshes Always Prove More Satisfactory.

Because when tight fitting, the seams are sometimes strained, causing the coat to leak. We, therefore, recommend loose fitting mackintoshes.

WE SELL SATISFACTORY MACKINTOSHES. All mackintoshes sold by us are strictly reliable garments, but too much is sometimes expected of them. (See rules above for preserving mackintoshes.) All cloths made up into mackintoshes are of tested qualities and selected for the making of mackintoshes because of their particular suitability, and will prove a thorough protection from rain under ordinary or severe storms. However, in extraordinary storms or continuous all-day rains, it is possible for the rain to penetrate the best mackintoshes made, in some degree. This is due to the fact that the surface cloth holds some water, namely, it becomes saturated, and if it remains in this condition for many hours, some dampness may be observed on the inside. **For continuous heavy rain storm, an oil slicker or heavy rubber surface coat will be found more satisfactory, but for all general purposes there is no other garment that will be found better than a mackintosh.**

DEPARTMENT OF COLORED DRESS GOODS.

OUR NEW POLICY of getting 50 cents for each large catalogue, receiving payment in advance for all samples of dress goods furnished, thus practically doing away with all advertising expense, greatly reducing our clerical expense, makes it possible, with our immense buying power, to show in this, our Dress Goods Department, a line of all the newest novelties as well as the most staple dress goods, in colored, fancy and black, in domestics, and in silks, values that will astonish and please everyone who sends for samples from this department, or who takes advantage of any of the hundreds of extraordinary price values quoted herein.

TO GIVE YOU FAR MORE VALUE for your money than you can possibly get elsewhere, with a view to furnishing you dress goods at even lower prices than dealers can buy in case lots, prices that will mean a saving to you of from one-quarter to one-half, as against any price that other houses can name, solely in your own interest, with the one object in view, namely, to give you much more for your money than you can possibly get elsewhere, we have inaugurated our new policy of getting pay for all catalogues, all samples, and deducting all advertising expense from our selling prices, all done to give you the greatest possible value for your dollar.

YOU CANNOT APPRECIATE THE VALUES we are giving in this department from any illustration or description contained herein. By comparing our catalogue with catalogues published by any other house, or by attempting to compare the samples with any others of your storekeepers at home or any house abroad, or our illustrations and descriptions, you can scarcely appreciate the amount of money we can save you, how much you will gain by sending to us your order for needed dress, skirt, waist pattern or other goods.

TO UNDERSTAND FULLY how much we can give you for your money, how great an advantage our new policy gives us over all competitors, how much you can save on every yard of dress goods by sending your order to us, either write to us for such samples as you want, under our terms of 1 cent for samples of each number, and compare the samples with those furnished by any other house, or better still, select the goods wanted from our catalogue illustrations and descriptions, send us your order and your money with the understanding that if the goods are not perfectly satisfactory when received, and when compared with the same or similar goods furnished by your storekeeper at home, or by any dealer anywhere, if you do not find ours, quality for quality, very much lower in price, you can return the goods to us at our expense of express or freight charges both ways and we will immediately return your money. You would know you could not afford to buy one yard of dress goods, silks or domestics, not one yard of anything in the dress goods line from your storekeeper at home or from any dealer anywhere if you could first examine and compare our prices with those of other houses. We therefore urge that before ordering dress goods or silks of any kind for any purpose, you either get samples from us, or send us your order selected from our catalogue, with the understanding that your money is to be immediately returned to you, if we do not please you and save you money.

OUR LINE OF COLORED DRESS GOODS as well as all staple black goods, silks, domestics, etc., includes the very latest styles for this season. We are direct importers, buying these goods direct from the makers, both at home and abroad. We place with them the largest contracts that are placed by any buyers in this country, and we own the goods on the basis of the actual cost to produce with but one small profit added and without adding anything for advertising expense, and with the most economic system of handling we are able to name prices against which there can be no competition.

ECONOMY IN ORDERING. In ordering dress goods we always urge that our customers order two or more dress, waist, or skirt patterns at a time. If you only need one dress pattern try and get a friend or neighbor to join you and make up an order for two or more dress patterns, for in this way it will reduce the express charges on the goods you will order to next to nothing, the express charges for 15 or 20 yards being very little more than for from 5 to 10 yards. The express charges, however, you will find, even on a single dress, skirt or waist pattern, will amount to next to nothing as compared to what you will save in price.

OUR GUARANTEE AND REFUND OFFER. You can select any goods from this catalogue, send us your order with your money, with the understanding and agreement on our part that if the goods are not found perfectly satisfactory when received, and you are not convinced that you are saving money by ordering from us, you can return the goods to us at our expense, and we will immediately return your money.

WHY SAMPLES ARE NOT NECESSARY. While we will furnish samples of any numbers wanted on our regular terms, as explained on this page, we always recommend that our customers make their selections from the illustrations and descriptions and do not delay to write for samples. If you will state the goods wanted by catalogue number, give us an idea of color and pattern wanted, also state complexion and color of hair of the party for whom the dress goods is wanted, we will always assist you by giving you the services of our professional or expert dress goods men, and see that you get the very best values possible to furnish, we, of course, guaranteeing that the color, pattern and all will be satisfactory or we will immediately return your money. By making your selections from the catalogue illustrations or descriptions, without first writing for samples, an expert in the department will select for you the very best thing in our house as to color, pattern, style, etc., in accordance with your wants, and such as will be most becoming to your complexion.

DRESS GOODS SAMPLES FURNISHED AT ONE CENT PER NUMBER.

To those who wish to see samples of dress goods before ordering, we will from our sampling department furnish you samples of anything in our dress goods line, including fancy, colored, black or other dress goods, silks, etc., at 1 cent per catalogue number. By this means we will furnish you a sample of all the shades and patterns represented by any one catalogue number, for 1 cent. In the one number there may be from one to two dozen different shades or patterns and the 1 cent you send for that number will entitle you to as many samples as there may be shades or patterns under that number, so, in writing for dress goods samples, be sure to state the catalogue number of samples wanted, enclose 1 cent for each number, and all the samples under each number will be sent to you by return mail, postpaid.

UNDERSTAND, YOU MAY ASK FOR SAMPLES of a certain black goods and only one sample will be furnished on that number. You may call for another number in colored goods, and we may have as many as one dozen different shades in this number, and a sample of each one, representing our entire line under that number, will be sent you for the 1 cent. Most houses furnish samples of dress goods free for the asking, send out from 25 to 100 samples, and as such houses are known to furnish samples free, we know from our own experience, that thousands of applications for free samples are received from people who have no thought of buying, but simply write for samples out of curiosity, many of the applications coming from children, and in this way the free sampling expense is enormous and must be added to the selling price of the goods, so when you buy a dress pattern from any house that furnishes samples free for the asking, you can be sure, in addition to the real value of the goods you pay for, you are paying for a good many sets of samples that have been distributed free among people who never order.

IF YOU DO NOT feel like selecting the goods you want from the catalogue illustrations and descriptions, sending us your order with the understanding that the goods must be perfectly satisfactory or your money will be returned; if you want to see samples first, be sure to state what samples are wanted, by number, enclosing 1 cent for each catalogue number, and the samples will be sent you by mail, postpaid. After you have received the samples and selected the goods wanted, you can send us your order with the understanding that if you are not convinced, when you receive the goods, that at our price you have saved more than ten times the money sent for samples, as against any price you can get from any other house, we will cheerfully refund the money paid us for samples.

BLACK DRESS GOODS.

OUR NEW, ENLARGED AND PERFECTED BLACK DRESS GOODS DEPARTMENT.

WE HAVE MADE IT A STUDY to bring to perfection this important and popular department. We have expert buyers in Europe and America who give their whole time to locating new and choice weaves, which are immediately added as soon as they appear. With their expert knowledge of mills, markets, fabrics and intrinsic value they vie with each other as to which can secure for this department the most telling and most desirables weaves and pattern effects. Never before has our black dress goods department been in a position to benefit our thousands of customers all over the globe as for the coming season. Never before were so many new and fashionable foreign and domestic weaves, all the new creations of the weavers' art from Paris, London, Berlin and Rubaix, shown in such generous profusion. All the stylish, all wool and also silk and wool, Henriettas, Serges, Cheviots, Armurs, Silk Souffles, Venetians, Drap D'Almas, Drap D'Etes, Melrose cloths, Sharkskins, Grenadines, Mattalasse cloths, Mohairs, Sicilians, Broadcloths, Kerseys, Meltons, Vigoreux, Batistes, Camel Hairs, fine French Etamines, twine cloths, Grenadines, Natte cloths, canvas weaves, Mistrals, Albatross cloths, Bedford cords, Poplins, unfinished worsteds, Prunella cloths, Crepons, Velours, Peirolas, etc. In fact, there is not a new or pretty weave that is not to be found in our complete and comprehensive black dress goods department, for fall, 1902 and spring, 1903. The choicest and most beautiful things shown for the coming season by such celebrated makers as B. Priestly & Co., also Ecroyd's of England, Arnold of Greitz, Germany, Michua of France, the best and choicest styles of our best makers of America, including Boehmann, Botany worsted mills, Broadhead's Jamestown worsted mills and many other reliable and up to date first class black goods manufacturers can be found in our perfect assortments. Every item quoted in this department is a marvel of perfection as to weave and color. Not a poor black is allowed to leave our house and we have such an enormous outlet that we are in a position to buy in mammoth quantities, in fact, requiring several mills to supply us in sufficient quantities for our phenomenal demands, thus getting the minimum of costs and enabling us to save our patrons 33⅓ to 50 per cent on the prices asked by the jobbers or retailers that buy 10 or up to 50 piece lots.

WHY IT IS NOT NECESSARY TO SEND FOR SAMPLES. While we are glad to furnish samples on our regular terms, those who make their selections from the illustrations and descriptions and rely on our judgment to give them the very best value in our house, are also satisfied, better satisfied, in fact, when they give us some little license in helping them to select, than when they themselves select from samples; for, from a small sample, say two inches square, it is impossible for you to judge the patterns and real value as well as if you were in our store selecting the goods from a piece. This we do, and give you the judgment of a professional black dress goods man, when you send us your order direct from the catalogue; and, furthermore, if you order a dress pattern, and we have an odd piece of better goods, if there is any way we can possibly give you anything, even more than we advertise, you are sure to get it. Select anything from our black dress goods department, send us your order. You take no risk in doing so, for if the goods are not found perfectly satisfactory in every way, you can return them to us at our expense and we will return your money.

DRESS GOODS SAMPLES. As previously explained, we will send dress goods samples upon receipt of 1 cent for each catalogue number you want samples of.

OUR 69-CENT PRICE PER YARD, $4.14 for a full six-yard dress pattern, a price that does not cover the cost to manufacture, the cost of material and labor on these goods, a price that means a saving to you of $4.00 to $6.00 on a dress, is made possible by reason of our buyer being on the ground at a forced sale and taking the entire stock of the mill. The manufacturer was compelled to raise money, and the goods were put up to be sold for spot cash to the highest bidder and they went to us at the ridiculously low price to which we add our one small percentage of profit. This is one of other numbers in our line where the cost to manufacture has not been considered in making the very low selling price, it is one of those cases where our buyer on the ground closes out a lot of goods at his own price and then turns them over to you at just what they cost us in immense quantities with only our very small percentage of profit added.

OUR DRESS GOODS DEPARTMENT FOR VALUES IS ABSOLUTELY MATCHLESS. There is nothing that attempts to approach it, and every one who patronizes the department will substantiate this claim. Order a dress pattern from this department and you will be one of our endorsers.

OUR MAMMOTH SILK DEPARTMENT.

Only those who have patronized this department, only such of our customers as have ordered silks from our house, and have had a chance to see, examine and compare our goods with those offered by other dealers can appreciate the values we are giving in this department.

BY ABOLISHING OUR ADVERTISING EXPENSE, getting 50 cents for our big catalogue and receiving cash in advance for silk and dress goods samples furnished, by reducing our clerical and advertising expenses, deducting all this expense that other houses must add to their selling price, by giving you the benefit of this saving and then by figuring our profits on silks on the exact same basis as we figure our profits on the most staple commodities in our store, namely, one small percentage of profit above the actual cost to produce, as one of the largest buyers of silks in this country, every silk price quotation is a wonder of value and so much lower in price than other houses for the same quality of goods that you must see, examine and compare the silks we offer with those offered by other houses to appreciate the values we are giving.

BY BREAKING AWAY FROM THE LONG ESTABLISHED CUSTOM of the dry good trade, by which fancy profits have been asked for everything in silks, placing these goods on our one small profit basis, giving our customers the benefit of all advertising and unnecessary expenses, thus making still lower prices, this department has grown until we are today one of the largest handlers of foreign and domestic silks in this country.

WE BUY OUR SILKS DIRECT from the largest foreign and domestic makers, we buy them in quantities that secure for us the very lowest prices, and to the cost to us is added only our one small percentage of profit.

OUR GUARANTEE AND MONEY REFUND OFFER.

SELECT ANY SILK FROM THIS CATALOGUE, ordering by number and description, and we will send the silk to you by mail or express, as directed, and if, when received, it is not found perfectly satisfactory, if you are not convinced that you have saved from one-quarter to one-half in price, if you do not feel that you have received such value for your money as you could not possibly get elsewhere, you can return the goods to us at our expense of express charges both ways and we will immediately return your money.

...ABOUT EXPRESS AND POSTAGE CHARGES...

THE TRANSPORTATION CHARGES ON SILKS are very light, and this cost will be next to nothing as compared to what you will save in price. Silks can be sent by mail, postpaid, at an expense ranging from 3 to 4 cents per yard, according to the weight of the goods. 10 to 35 cents will pay the postage on any waist, skirt or suit pattern.

AS A MATTER OF ECONOMY we especially recommend that you order two or more waist, skirt or suit patterns, even if you have to get a neighbor to join with you, for two patterns can be sent by express to almost any point for about the same cost as one, and by dividing the express charges between you, you reduce the express charges on the goods you want to only a few cents.

SAMPLES FURNISHED AT 1 CENT PER NUMBER.

WHILE WE ALWAYS ADVISE OUR CUSTOMERS to make up their order from the catalogue illustrations and descriptions, and without waiting to first write for samples, send your order and your money to us, always with the understanding that if the goods are not perfectly satisfactory, you can return them to us at our expense and we will immediately return your money, we will, however, furnish samples of any of our silks or any kind of dress goods at 1 cent per catalogue number. MOST HOUSES furnish samples of silk and other fabrics free for the asking, and from experience in the past we know it is very expensive, for hundreds of thousands of samples in this way are sent to people who have no thought of buying, and all this enormous expense is added to the selling price of the goods. We save all this by getting paid for all samples, and when you order a dress pattern from us you do not pay for 25 to 100 sets of samples that have been sent out to people who never buy.

EVERYTHING IN OUR HOUSE is done solely in the interest of our customers, our aim being to give the greatest possible value for the money and still leave us one uniform, small percentage of profit.

IF YOU HAVE ANY USE for anything in silks, you cannot afford to order elsewhere until you have seen and examined samples of our goods, and compared them with goods offered by other houses and learned how much you can save by buying from us.

A large New York silk house was compelled to raise money, and asked us for a spot cash offer on 3,500 pieces of this fine silk. We made them a ridiculously low offer; but, to our surprise, it was promptly accepted, to get immediate money. To give our customers the advantage of our purchase we add but our one small percentage of profit and make the heretofore unheard of price of 49 cents for this regular $1.00 silk.

We have on hand over 1,900 pieces, and, confining the sale to the orders that come from our catalogue, hope to be able to supply our customers in any quantity they want until the next catalogue (No. 112) is issued.

This illustration gives you an idea of our 49-cent silk made up in a waist. Of course, you can make it up any style.

WITH OUR IMMENSE BUYING POWER and with the eliminating of the expense of free samples and free catalogues, our price offerings are so startling that they can only be understood when seen, examined and compared with the goods offered by others.

THIS IS A GENUINE GUINET ET CIE fine, all pure silk, rustling taffeta, one of the very best silks made, positively the very latest style, and more in demand than any other silk manufactured today; a good weight, 18 inches wide; makes up very stylish in a handsome silk waist or silk suit, and is especially desirable as a foundation, to be covered with laces that are so popular. These silks come in a big variety of beautiful colors, including everything for the street, evening and receptions—pink, coral, blue, turquoise, maize, straw, lavender, heliotrope, purple, cardinal, scarlet, wine, steel, silver, gray, brown, tan, ecru, nile, empire, olive and myrtle green, old rose, cerise, American beauty, reseda, national blue, light and dark navy, white, cream and black.

This silk has to be seen in the piece in order to be fully appreciated. It is a silk lustrous and heavy, and has that crisp and at the same time mellow touch which is always so appreciated in a taffeta silk. It is a silk that is suited for foundations, for entire costumes, waists, petticoats, drop skirts suitable to be worn with the very fashionable grenadines and lace nettings that are so fashionable this season. We could not talk too highly of the merits of this silk. It is a silk that we thoroughly recommend, and at the price it is simply unmatchable by anybody. The colors are light blue, straw, pink, heliotrope, bright red, navy, brown, lavender, cream, white and also black.

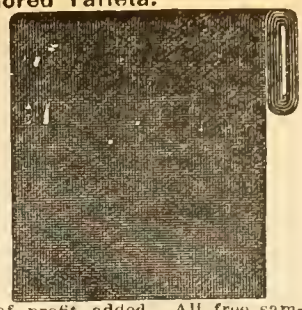
Our 89-Cent Unbreakable Heavy Weight 27-Inch Imported French All Silk Colored Taffeta.



At 89 cents per yard, in all the different colors, we offer this 27-inch, extra heavy, velvet finished, unbreakable pure silk taffeta direct from the Lyons Mills of France, as the equal of silk taffetas that retail everywhere at $1.50 to $1.75 per yard. 89 cents barely covers the cost to import, with but our one small percentage of profit added. All free sampling and free cataloguing has been deducted from our selling price, and if you order a suit, skirt or waist pattern from this special number at 89 cents per yard, and you do not find it one of the handsomest colored taffeta silks you have ever seen, and you are not convinced that you are saving from $3.00 to $6.00 on a dress pattern; if you do not find it a handsomer fabric than is carried by the average dry goods store, such goods as will be found only in exclusive silk houses and fine dry goods stores of large cities, and there at about double our price, you can return it to us at our expense and we will cheerfully return your money. The past year our trade has grown until we are recognized leaders in the silk line, consuming the output of some of the best French makers, and in all our leading numbers controlling the selling price in this country. By our method we have abolished all the excessive profits it has been the custom to get on silk goods. We have placed them on our most staple domestic profit basis, and as a result people of very modest means can buy from us such a silk pattern as heretofore they have not felt was within their reach. This handsome, unbreakable, all pure French silk is one of the finest colored taffetas made, a goods we can guarantee for quality, put out by the manufacturer as his highest unbreakable grade. It comes in cream, white, light blue, porcelain, pink, heliotrope, violet, nile, gray, brown, tan, cardinal, rose, also black. The colors are solid, very soft, lustrous and mellow. This 27-inch width you will note is extra wide for a colored taffeta, woven this width especially to our order and done so as a matter of economy for the buyer, as it cuts to much better advantage than the narrow goods. Three yards makes an ordinary waist and ten to twelve yards are sufficient for a suit. Order a waist, skirt or suit pattern from this number, enclose our price, we will send it to you with the understanding that if it isn't perfectly satisfactory and one of the richest colored all pure silk French taffetas you have ever seen, if you are not convinced you are saving $3.00 to $6.00 on a suit pattern and getting a handsomer thing than you would get from your storekeeper at home, you can return the goods to us at our expense and we will return your money. OUR MAMMOTH BLACK SILK DEPARTMENT.

NO ILLUSTRATIONS OR DESCRIPTIONS, no attempt to compare our catalogue with other catalogues, nothing but seeing the samples, or better still, seeing the goods themselves, will enable you to appreciate how much more value we can give you in black silks than you can get from any other house. Putting our entire line of silks on the same basis of profit as the most staple goods in our house, charging 50 cents for our big catalogue and receiving payment in advance for samples, thus deducting all advertising expense from our selling prices, we offer from this, our Black Silk Goods Department, values not even approached by any other house. We can furnish you a waist, skirt or suit pattern at a lower price per yard than dealers can buy the same grade of goods in dozen piece lots.

OUR GUARANTEE AND REFUND OFFER.

TO CONVINCE YOU that we have no competition in this line, and that you can buy from us at lower prices than you can buy elsewhere, we only ask that you either send for samples to compare or send us your order with the understanding and agreement that if the goods, when received, are not perfectly satisfactory, and much greater value for your money than you could possibly get from any other house, you can return them to us at our expense of express charges both ways and we will immediately return your money.

MOST HOUSES FURNISH SAMPLES of silks free for the asking, and they send out thousands of samples to people who never buy, and for every single sample that brings an order, dozens of samples are cut up that never bring orders. We, too, could furnish samples free for the asking if we, like others, would add 10 to 20 per cent to the selling price of the goods.

IF YOU WANT SAMPLES of silk we will furnish them at 1 cent per catalogue number. When you order we will save you from 10 to 100 times the cost of the samples we furnish you. By 1 cent per catalogue number we mean that we will furnish you samples of our entire line under that number. There may be one or one dozen samples, depending on the number of patterns and colorings in the number.

WHILE WE CHEERFULLY FURNISH SAMPLES at 1 cent per number, we recommend that you make up your order from the catalogue illustrations and descriptions without delaying to get samples. You take no risk, for we will send you the goods with the understanding that if they are not perfectly satisfactory when received, you can return them to us at our expense and we will immediately return your money.

SILKS CAN BE SENT BY MAIL, postpaid, at an expense of 3 to 4 cents per yard, depending on the weight. By express two waist, skirt or dress patterns can be sent for about the same cost as one. We therefore urge that you make your order as large as possible, even by getting your friends to join with you, in this way reducing the transportation charges to next to nothing.

Cotton Batting.

Almost all dealers have their batts put up today with but 12 ounces or three-fourths of a pound to the roll, which makes comparison of prices by the roll obviously unfair, unless weight is taken into consideration. Rolls of batting are supposed to contain 16 ounces. We quote ours at exact weight.

All our rolls of Cotton Batting weigh 16 ounces—except the first number which weighs full 14 ounces. Our batts are patent folded, and are not simply a wad of cotton to be replcked and put into the quilt in bunches; each batt is nicely papered, is folded, and will open up all the same thickness, 36 inches wide and 7 feet long. Cotton batting is put up 50 pounds to the bale.

Linen Goods Department

WE ARE MAKING THIS ONE OF THE STRONGEST DEPARTMENTS IN OUR HOUSE.

ON TOWELING OF ALL KINDS we are absolutely headquarters. We own these goods at but a shade above the cost of manufacture, and we are making an effort to establish the largest trade of foreign and domestic toweling in this country, and to do this we have narrowed down our margin to but a shade above the actual cost of handling. If you are in need of any toweling in any of the different grades, foreign or domestic goods, and will make your selection from this year's catalogue, you will get such value as never before went out of this or any other house. In ordering merchandise do not overlook this department. **Be sure to include the needed toweling or other linens and you will be surprised at the money we will save you.**

IN TABLE CLOTHS our purchases have been exceedingly large, and on our foreign and domestic table linen, covers, napkins, table sets, etc., we are offering astonishing values. We have greatly increased our line to include all the very latest productions for this season; all the new fancy and staple things, and our prices are made to practically compel the orders to come our way. **If you buy anything in table linen, you will be sure to pay from 25 to 50 per cent more in price.** Not satisfied with the business we have done heretofore in this department of linen goods, we have taken it up for this season on a most extensive scale. We have compared the values we are now offering with those offered by other houses, and we know they are below the lowest. **We know we are giving better value for your money than can be offered by any other house.**

WONDERFUL WHITE GOODS VALUE.

WE SHOW WONDERFUL WHITE GOODS VALUES. In calling your attention to this, our special White Goods Department, a sub-department in our general department of wash dress goods, linens, etc.; wonderful, because we do not hesitate to say, without fear of contradiction, that this season we are giving values heretofore unknown in white goods. **THE GENTLEMAN IN CHARGE OF THIS DEPARTMENT,** who has given his life's experience in the handling of white goods and linens, and whose services we have secured from one of the largest white goods dealers in this country, said to us when we told him that our selling prices on white goods should be the one small profit above the actual cost, and that every advantage he had secured in buying must go to our customers and not to us, even though his purchases had been particularly well made by reason of his skill in detecting values and his instructions to buy in large quantities, that this was an entirely new departure for him, and that it was customary with all wholesalers of white goods to get liberal profits, and on many of the higher priced goods to get fancy profits. **We told him—new departure that it may be—it was our fixed policy that our customers must own our goods at just what they cost us, with but our one uniformly small percentage of profit added.**

WE CALL YOUR ATTENTION to our big line of White Goods, carefully selected and purchased under contract from the largest makers of these goods; our new line of white Victoria Lawns, India Linens, White Organdies, India Mull, Swiss Mull, Dotted Swiss, Pique, Linens, Nainsooks, new plain, fancy and colored Dimities, all the very latest and handsomest lace effects. **We invite your attention to these new goods purchased for this season as described and quoted in this department,** with the promise that if you will send us your order you will get such value as you could not possibly get elsewhere; that you can buy in the smallest quantity from us from this department for even less than home dealers can buy in any quantity.

OUR GUARANTEE OFFER. Select any goods from this, our White Goods Department. If you want a handsome summer costume, a waist or other garment from which these new and handsome white goods productions can be made, send us your order, and if the goods when received are not perfectly satisfactory, if they are not much greater value than you could possibly get elsewhere, if you are not convinced that we are saving you all the profit your storekeeper at home would make, and more, return the goods to us at our expense of express charges both ways, and we will immediately return your money.

DRESS GINGHAMS.

DRESS GINGHAMS form a special branch of our Wash Dress Goods Department, and in this Gingham Department for this season we are offering values such as never before went out of this or any other house.

WE HAVE ARRANGED WITH THE BEST MILLS in Scotland on contracts so large that we can this season offer the highest standard of quality at less than your dealer can buy in any quantity. On the basis of the actual cost to make, operated on the most extensive scale, with but our one small percentage of profit added, you can buy from this department in any quantity at a saving of from 25 to 50 per cent in price.

FROM THE ILLUSTRATIONS AND DESCRIPTIONS you can form but little idea of the extraordinary values we are giving. You must see, examine and compare the ginghams we show this season with those offered by any other dealer to appreciate the style, the quality and the money we can save you. While we will cheerfully send samples, small samples do not do the goods justice, and cannot satisfy you as to pattern and style.

SELECT THE GOODS WANTED from the illustration and description, give us an idea of the color and pattern wanted, and rely on the judgment of our man in charge of this department, an expert judge as to new styles, quality and value generally, and he will not only furnish you just what you want, the gingham most suitable to your requirements, but will make it his business to see you get the best gingham value in our house, the best thing possible to give for the money. We feel that too much cannot be said in behalf of this department. We know if you order once, you will order again and again. We know you will influence your friends to order from us.
